Index to Subjects
Vol 106 – 1990

The method of compiling the index is largely the same as that described in the introduction to the subject index of Vol. 79 (p. xxxix). Other symbols in parentheses refer to papers, etc., published in the *Journal* (see list on page 6).

A

Abrasion, testing, in assessment of light fastness of velour automobile upholstery 375
Abrasive, cloth, effect of finishing processes on mechanical properties 255
Absorption of dyes, relation to structure 116
of foam 404
of ions, by acrylic fibres (P)18
Accessibility, to surface of cellulose, infra-red spectroscopic measurement 120
Accuracy, of match prediction, on non-standard substrates 376
Acid dyeing, of polycaproamide fibres 148
– of polyester, low-temperature 32
– of textured multifilament nylon 336
– of wool 80
dyes, azo, derived from 3-amino-7-nitro-2*H*-1, 2-benzothiazine-1, 1- dioxide 334
– complexes, application in the dyeing of nylon 336
– nonionic surfactants with 371
– pyrazolone, absorption by polyamide fibres (P)110
– on silk, sorption isotherms 336
– structures, synthesis of disperse and cationic dyes from 368
treatment, in bleaching of cotton 82
– effect on tensile strength 294
Acidic, monomers, grafting by 376
Acids, chromotropic, NMR spectroscopy of 148
Acrylamide, derivatives, in tanning 403
Acrylated, melamine, in ultraviolet-curable coatings 340
Acrylic fabrics, printing with basic dyes 33
– tumbler drying 374
fibres, bactericidal 376
– dyeing behaviour, effect of spinning dope additives on 254
– ion absorption by (P)18
– structural transformations 376
– wet spun, gel dyeing of 32
Acrylonitrile, graft polymerisation onto modified cellulosic material 199
Acylation of anthraquinonyl methylene phosphoranes in a two phase system 334
effect on dyeing and fastness of azo dyes (P)54
Adaptation, visual 198
Additives, effect on fixation efficiency of reactive dye 148
spinning dope, effect on dyeing behaviour of acrylic fibres 254
to binders 195
Adhesion in coating with polyurethane dispersions 151
of sizes, factors influencing 196
Adhesive properties, of textiles, improved by surface fluorination 35
viscosity, effect on disorientation of pile during flocking 402
Adsorption of direct dyes on cotton 400
of pyrazolone acid dyes, by polyamide fibres (P)110
Aeration, of activated sludge 339
Aerobic degradation, of organic compounds 403
waste water 339
Aerodynamic, dyeing system, environmentally safe 402
Aftertreatment, cationic 252
– effect on coverage of neps (P)104
for wool dyed with reactive dyes 401
AKDN-602, dyeing machine 83
Alcoholysis, and hydrolysis, of sulphonyl reactive dyes 400
Algorithm, for kinetics of fabric washing process 292
Alkaline treatment, of polyester fabrics 82
– of polyester/cotton 117
Alkaryl-2-pyrazolines, fluorescence quenching studies 78
Alkylamination, of naphthazarin 115
Aluminium, flakes, orientation in paint 294
Amide, environment, photodegradation of C.I. Acid Orange 60 and C.I. Acid Green 25 in 369
Amines, aromatic, diazotisation with glycol nitrite 194
2-Amino-9,10-anthraquinone, electronic structure 79
6-Amino-3,3'-bis(*p*-dimethylaminophenyl)phthalide, synthesis of monosubstituted derivatives 251
3-Amino-7-nitro-2*H*1,2-benzothiazine 1,1-dioxide, azo dyes derived from 290
Aminoarylsulphonanilide-3'5'-dicarboxylic acids, synthesis and properties 334
Aminoiodoanthraquinones 334
Aminophenyl-X-azolopyridines, dyes from 78
Ammonia liquid, in dyeing and finishing 116
– dyeing with vat dye suspensions in 252
– in simultaneous dyeing and mercerising 79
Amphiphiles, azobenzene-containing, structures of 194
Anaerobic, neutralisation of textile effluents 375
Analysis application-related, of textile dyes 403
of indigoid dyes by mass spectrometry (P)22
of involatile textile dyes 369
microchemical techniques 151
of particle sizes in disperse dye systems 339
Animal hairs, pretreatment and dyeing 376
Anthocyanidins 119
Anthraquinone aryl, synthesis 334
derivatives, sulphonated, utilisation of waste liquors from 197
dyes, synthesis and properties (P)388
nitration 116
Anthraquinonyl, methylene phosphoranes, acylation in a two phase system 334
Anthrarufin, nitration products 115
Anti-redeposition agents, effects on washing of wool using surfactants 117
Anticorrosive coatings, evaluation of 404
pigments 334
Antifelt, treatment, of wool, 'Superwash' process 338
Antifouling, paints 119
Antimicrobial acrylic fibre 376
activity, of butadienochromophoric chain-substituted asymmetric cyanines 290
treatment, of carpets 81
– effect on dye fading and fibre yellowing in nylon 371
Antioxidants effect on photostabilisation of dyes and pigments (P)135
for topical treatment of upholstery fabrics 338
Antique purple 120
Antistatic developments 338
finishing, of nylon 80
polyester 294
treatment, of carpets 197
Aperture, colours, unique hues in 198
Apparel, manufacturers, shade sorting for 376
Application bulk, Colorstar systems for 375
of print paste, in rotary screen printing 149
of reactive carbohydrates 374
– dyes 369
of textile printing thickener 373
Aramid, fibres 199
Aromatic, fabrics, production of 402
Asbestos, and alternative fibres 337
Assessment of aerobic degradation of organic compounds 403
of daylight simulators for measurement of optical whiteners, with a sphere spectrophometer 339
of light fastness of velour automobile upholstery, by surface abrasion testing 375
of numerical shade sorting methods (P)315
Atmospheric quality, and textile floorcoverings 33
Australian developments in wool technology 118
process, for dyeing and printing of textiles 253
system, for wool colour measurement 198
Autofloat, drier 374
Automated dyeing plant, dye colour data processing in 375
garment dyeing 35
laboratory, assessment of mercerising and causticising processes 292
recipe prediction, for linen industry 198
Automatic cheese-dyeing unit 197
dispensing, of dyes in a print works 373
Automation incomplete, of a dyeing machine 375
in continuous dyeing 35
dyehouse 83
and quality, in batchwise dyeing 151
– in machine dyeing 118
Automotive leathers 295
upholstery, velour, assessment of light fastness 375
– finishes 404
Auxiliaries 79
environmental aspects 33, 335
in high temperature dyeing of polyester 80
new 148
quality assurance for 151
silicone surfactants in 369
test methods 118
Azo dyes, acid, derived from 3-amino-7-nitro-2*H*-1, 2-benzothiazine-1, 1- dioxide 334
– azo-hydrazone tautomerism 194
– coloration of fabrics by synthesis of 116
– disperse, in carrier dyeing of polyester fibre 80
– – derived from 3-amino-7-nitro-2*H*1, 2-benzothiazine 1, 1-dioxide 290
– effect of acylation on dyeing and fastness (P)54
– interactions, with bovine serum albumin 371
– – with surfactants 335
– – with water-soluble polymers 78
– photo-oxidation (P)176
– photochemical behaviour in polymeric matrices 337
– pyridine, NMR spectroscopy of hydrazone-azo tautomerism 400
– pyridone, photofading in solution 368
– reduction, in the stripping of dyeings and discharge printing 373
Azo-hydrazone tautomerism, of azo dyes 194, 400
– NMR spectroscopy 78, 400
Azobenzene, structures of amphiphiles containing 194
Azomethine, dyes, reduction by ketyl radicals 78
Azotrimethine, cyanine dyes, ß- and gamma-substituted, synthesis of 334

B

Bagaruwa-aluminium, combination tannage 119
Bands, electronic absorption, in intraionic dyes 368
Basactiv system, textile printing with 254
Basic dyes, printing of acylic fabric with 33
– – of polyacrylic acid-cotton graft copolymers with 372
Bast, fibres, lignin component 116
Batch dyeing, automation and quality 151
– exhaustion and levelling 149
– – kinetics 116
– self-regulating 336
Beer-Lambert law, conformity of basic dyes to 401
Benzenediazonium, salts, substituted, reaction kinetics of 194
Benzimidazolone, derivatives, synthesis 115
Benzothiazoles, preparation 251
Benzoxazolone, derivatives, synthesis 115
Benzyl, alcohol, emulsions, desorption of solvent after washing with 255
Biacetyl, photo-oxidation of acid dyes in the presence of (P)176
Binders, additives to 195
radiation-curable, for textile substrates 338
Biodegradation speed, of surfactants 369
'Biomer', paint 295
Bis-styrylbiphenyl fluorescent dye, flash photolysis studies of 251
Black, images, chromogens for 251
Bleached, jute fabrics, effects of melamine-formaldehyde resin on 373
Bleaching agents, oxidative, influence on effluent AOX content 34
continuous 196
of cotton, formation of active adsorbed organic halogen compounds in 254
– low temperature, with persceticacid 338
– with peroxide 150
– use of acid in 82
hydrogen peroxide, mechanism 338
hypochlorite, effect of sulphamic acid 117
irradiation in 370
processes, effluents from 34
of wool, with hydrogen peroxide, effect of urea on 82
Blue-violet, zirconium silicate pigment, synthesis from zircon mineral 369
Blues, bright, and greens, on polyester and cotton and their blends 370
Bluish-green, dyes, anthraquinone, for synthetic polymer fibres 290
Bonding, thermal, of nylon 84
Bovine, serum albumin, interaction with chelating azo dye 371
Brightening agents, applied to wool 197
– fluorescent, properties of (P)49
α-Bromoacrylamide, reactive dyes, laser Raman studies (P)59
Broom, new (C), 153
Brown, zirconium silicate pigment 400
Brown-green, zirconium silicate pigments, synthesis from zircon mineral 369
Bubble films, dynamic properties 336
size distribution, in foam, determined by image processing 375
Bulk application, Colorstar systems for 375
of continuous filament nylon yarn 371
Bulked continuous filament carpet yarn, from poly(butyleneterephthalate) 294
Butadienochromophoric, chain-substituted asymmetric cyanines 290
Buyers' guide, to flame-retardants 280
to garment drying machinery 35
to dyeing and washing machinery 375
to process control 256

C

C.I. Acid Green 25, photodegradation in an amide environment 369
Acid Orange 60, photodegradation in an amide environment 369
Direct Black 17, mutagenic properties 251
Disperse Blue 94, sorption by polyester during thermal fixation dyeing 372
Reactive Blue 19, reaction and diffusion in cellulose 370
Solvent Yellow 18, crystal data for (P)108
CAD system, for use in textile printing 34
CAD/CAM systems, in textiles 372
units 197
Californian, paint manufacture 340
Celling, young dyers (C)377
Capillary, assemblies, flow of water and dye in 81
Carbamate, fibres, dyeing properties and processing 256
Carbamoylethyl, starch, printing of cotton with 81
Carbohydrates, reactive, synthesis and application 374
Carbon dioxide, laser radiation, in strengthening of pile fabrics 36
fibres 199
– in high performance composites 199
Carbonisation, damage to wool during 118
Carboxymethylation, of cellulose, kinetics, in the isopropyl alcohol system 340
Carpets colour formulation technology 403
cut-pile, winch-beck dyeing of 116
dyeing, and coating, continuous 32
– continuous, versus exhaust 371
– jet 148
industry, coloration in 401
mills, waste water processing 255
nylon 6, stain resist chemistry in 255
nylon, performance 296
printing, jet 34
soiling 120
stain release, by foam processing 293
treatment, antimicrobial 81
– antistatic 197
– stain resistant 255
tufted, colouring with foam systems 80

wool, cut-pile, winch-beck dyeing of 371
yarn, bulked continuous filament, from poly-(butyleneterephthalate) 294
Carrier dyeing, of polyester fibre, with disperse azo dyes 80
EDTA, for Palanil Violet 3B (P)25
Catalytic fading, of monochlorotriazinyl reactive dyes on cellulose under wet conditions 369
impurities, in peroxide bleaching of cotton 150
Cathode, ray tube, accurate colour representation on (P)356
Cationic aftertreatment, effect on coverage of neps (P)104
dyes, from aminophenyl-X-azolopyridines 78
– synthesis from acid dye structures 368
polymer, dyeing of immature cotton neps 371
removal from keratin 295
softeners, in textile finishing 374
Causticising, processes, automated laboratory assessment 292
Cellophane, roll, in study of reactive dyes 372
Cellulose acetate, fabrics, printing, with disperse dyes 81
– partial fractionation of 340
alkali-treated, thermal decompostion kinetics 199
carboxymethylation, kinetics, in the isopropyl alcohol system 340
catalytic fading of reactive dye mixtures on 194
chemical modification under heterogeneous conditions 294
derivatives, characterisation by solubility tests 340
dyeability, improved 199
dyeing, exhaust, with Procion H-EXL dyes 369
fading, of monochlorotriazinyl dyes on under wet conditions 369
– of reactive dyes on 369
Kayacelon React dyes for 291
native, fibrillar structure 294
photofading, of vinylsulphonyl reactive dyes on under wet conditions 400
reaction and diffusion of C.I. Reactive Blue 19 in 370
reactive dyes for (P)230
surface, accessibility 120
thiocarbonate catalyst, fixation of reactive dyes on cotton by 290
Cellulosic fibres, aqueous-spun regenerated, dyeability 335
– dyeability, with reactive dyes 335
– dyeing, continuous, with bifunctional reactive dyes 370
– – and printing, continuous 254
– – with reactive dyes, exhaustion curves for 370
– dyes for 195
– effect of dimethyloldihydroxyethylenurea on 82
– grafting 294
– influence of shrinkage and mercerisation parameters on structure and dyeing behaviour 335
– infra-red spectroscopy, of crystallinity changes 376
– interactions between dyes for 336
– printing, discharge and resist 150
– solvent-spun 256
materials, dyeing of, parameter estimation by liquid chromatography 370
– finishing, crease-resist, glyoxal as a formaldehyde free agent in 374
– modified, graft polymerisation of acrylonitrile onto 199
Cellulosic/synthetic polymer, fibre blends, dyeing with reactive dyes 370
Centenary, of indigo 401
$CF_3S(O) = NSO_2CF_3$, a very strong electron acceptor group in imidacyanine dyes 368
Characterisation of cellulose derivatives by solubility tests 340
of dyeing behaviour by dyeing indices 401
of the fibre structure of causticised polyester 376
Characteristics, of thin layers of dithiolene nickel complexes (P)363
Chemical analysis, of insect-resist agents on wool (P)241
– of surface of weathered cotton 83
industry, Swiss 200
Chemicals microprocessor controlled dispensing 35
recovery, membrane filtration techniques for 403
Chemistry of dyestuffs 337
in the service of the textile industry 79
Chromatic, induction, interpretation of 198
Chromatic/achromatic, contrasts, distinction by neural system 198
Chromatography flash, in purification of synthetic dyes 195
liquid, for parameter estimation in dyeing of cellulosic materials 370
Chrome dyes, continuous process for dyeing wool with 336
liquor, recycling, leather produced by 200
salts, basic, uptake in tanning 200
Chromium, management, for tanneries 120
Chromogens, for black images 251
Chromojet, jet printing system, for carpets 34
Chromophores, indigoid and quinoid 78, 115
Chromophoric, systems, new, in dyeing with reactive dyes 335
Chrysazin, nitration products 115
Cibafast W, photostabilisation of wool with 369
CIM, system 83
Clothing, protective, flame-retardant 296
CMC, calculation of small colour differences for acceptability 256
Coating, anticorrosive, evaluation of 404
applications, pigments in 252
of fabrics 118
and finishing, flame-retardant 255
fire or flame retardant 36, 339
fluorescent 295
hydrophilic polyurethanes 402
industry, US 295
organic 84
polymer-fibre bond in 151
polymeric 84
with polyurethane dispersions 151
PVC 117
radiation-curable, for textile substrates 338
science 119
surface, electron-beam curing and grafting 84
system, rotary screen 402
technology 120
transfer, with polyurethanes 402
ultraviolet-curable, acrylated melamine in 340
waterborne 295
Cobalt(III), complexes as initiators in photosensitive systems 404
Cochineal, dyeing with (L)113, (L)114
Coding, stage, neutral 152
Cohesion, in coating with polyurethane dispersions 151
Cold, sizing 196
Collagen, interactions with leather dyes (P)139
Colorants, risk prevention in use and handling 252
Coloration in the carpet industry 401
of fabrics, by azo dye synthesis 116
of hair, by melanin precursors 119
industry, future (C)297
of textiles, recipe prediction for 118
Colorimetry 35
on-line, in continuous dyeing 403
Colorstar systems, for bulk application and research 375
Colour analysis, computerised, with a video camera 376
aperture and surface 198
appearance, under various viewing conditions 198
of blends of precoloured fibres 339
channel, separate 198
characteristics, of alkali-treated polyester fibres (P)385
communication system 293
constancy, interpretation of chromatic induction 198
– mechanism of 198
contrast, mediating processes 198
control, in screen printing 373
copiers and printers, pigments for 290
couplers, pyrazolone, structure and photographic activity 115
data processing, in automated dyeing plant 375
– in integrated information system 35
decisions, and recipe optimisation 36
depth, of black-dyed wool and silk fabrics 371
difference, calculation 256
dispensing, in textile printers' colour kitchen 339
fashion, on wool, mathematical modelling of 84
formulation technology, for carpets 403
hard copy, role of organic molecules in 389
information, analysis of 152
kitchen, colour dispensing in 339
matching, accurate, on non-standard substrates 376
– computerised 35
– prediction system, with CRT colour monitor 198
– what is observer doing 152
measurement 256
– and control 84
– of wool, Australian system 198
metrics 35
monitor, CRT, in match prediction system 198
in newspapers (P)15
opponent, information, in the visual system 152
perception, model 198
printer, thermal wax 81
removal, in the dyeing process, use of cotton yarn for 255
representation, on a CRT monitor (P)356
value, measurement 35
vision 340
– modelling 152
yield, in indigo dyeing of cotton denim yarn 253
Colouring of nonwovens 291
of tufted carpets with foam systems 80
Colourist, importance of measurement unit for yarn dyeing to 375
Comfort, fibre 199
Communication, system, colour 293
Complexes of acid dyes and triethylamine, application in dyeing of nylon 336
cobalt(III), as initiators in photosensitive systems 404
indigo-metal 194
metal, of acid dyes 80
nickel dithiolene, thin layers (P)363
Complexing agents, based on phosphonium acid 149
– in scouring of cotton fabrics 196
Composites filament yarns in 84
high performance, new hybrid yarn for 199
synthetic fibres in 84
Composition, of detergents 149
Compositions, for pigment printing 196
Compressive, shrinkage, of knitted fabrics 119
Computer, integrated manufacturing, in dyeing 151
Computerised colour analysis, with a video camera 376
colour match prediction 35
dye-recipe prediction, for intimate fibre blends 376
optimisation, of resin finishing 254, 374
– of wool dyeing recipes 80
Concentration, and desalting, of dye industry effluents 403
Conductive polymers 120
properties, modification of synthetic fibres to achieve 294
textiles 376
Cone classes, in the fovea centralis 152
interaction, in yellow/blue opponent process 198
ratios, L/M 152
responses, trichromatic, conversion of 152
stage, signal transformations 152
Constitution, chemical, of disperse dyes 194
Consumer, awareness, and antimicrobial-treated carpets 81
Contact, drying, on drum driers 82
Continuous dyeing, automation in 35
– of cellulosic fibres, with bifunctional reactive dyes 370
– and coating, of carpets 32
– on-line colorimetry in 403
– and printing, of cellulosic fibres 254
– reproducibility in 401
– short run 370
– – procedures and equipment 374
– of wool with chrome dyes 336
Contrast, colour, mediating processes 198
Control of colour 84
of raising and singeing processes 255
of sizing ratios 292
of substances hazardous to health 372
systems 151
techniques on sizing machines 339
Correlation, between dye lab and dyehouse 375
Corrosion 200
Cost effectiveness, in exhaust dyeing of cotton 370
reduction, by recovery of sizing agents 34
– in effluent treatment, by use of heat recovery unit 293
in textile finishing industry 118
Costing, output, use of data processing in 34
Cotton 36, 152
bleaching, formation of active adsorbed organic halogen compounds in 254
– low temperature, with peracetic acid 338
– peroxide 150
– use of acid in 82
bright blues and greens on 370
crosslinked, dyeability and pore structure 118
denim yarn, effect of dyebath pH on colour yield in indigo dyeing of 253
desizing, use of peroxidase for 254
durable press, with methenolamine as additive, dyeing variables 401
dyeing, direct, fastness 371
– exhaust, cost effective 370
– and finishing 370
– improvement by modification (P) 307
– problems, web-nep procedure for prediction of 256
– reactive 32
– – effect of hydrolysis products on fastness 400, 401
– – reproducibility 290
– role of polyoxyethylenated stearylamines in (P)245
– in short liquor jet dyeing machines with reactive and disperse dyes 291
fabrics, coverage of neps in (P)104
– cross-linking treatment with DMDHEU using the high temperature steam process 254
– desizing, with enzyme and oxidising systems 82
– durable, hard-finishing 373
– durable-press, predrying 255
– effect of water- and oil-repellent finishing on air permeability 256
– fixation efficiency of Procion T reactive dye on 148
– flame-retardant finishing 293
– padding with dye solutions, magnetic activation in 400
– scouring 196
– starch size in 373
– stone dyeing 370
fibres, diffusion of cross-linking agents in 402
finishing, effluents, laboratory scale and bulk treatment 403
– foam systems for 196
– reactive, with acrylamidomethyl starches 374
fixation, of reactive dyes by cellulose thiocarbonate catalyst 290
fluorescent brightening agents on (P)49
HVI testing 340
knitted fabrics, pretreatment, on a combined steaming unit 292
– – and whitening 292
neps, dyeing with a cationic polymer 371
preparation, single-stage, solar-powered kier for (P)98
pretreatment, with thiourea resin derivative (P)307
printing, using carbamoylethyl starch in vat dye print pastes 81
scouring, using ultrasound 82
sewing thread, economic dyeing 400
surface, analysis 83
– energy, during preparation 196
yarn, direct dyeing 79
– used for colour removal in the dyeing process 255
– warp, transfer printing 372
Cotton/polyacrylonitrile blends 294
Coumarin derivatives, fluorescent, synthesis 334
6-Arylazo-Coumarin derivatives, synthesis and study 252
Alkyl-7-hydroxy-Coumarin, fluorescence quenching studies 78
Counter-ion, in photofading of Crystal Violet lactone 116
Couplers, oxidative 252
Crease-resist finishing 81
– of cellulosic materials, formaldehyde free, with glyoxal 374
– of linen, with foam 150
Crimped effect, production of 254
Cross-linking, agents, diffusion in liquor and cotton fibre 402
of cotton, with DMDHEU and DHDMI 118
– fabric treated with DMDHEU using the high temperature steam process 254
of emulsion polymers 84
of poly(vinyl alcohol) (P)321
Crystal data, for C.I. Solvent Yellow 18, (P)108
structures, of aminoazobenzenes 78
– of nickel complexes 116
Violet, lactone, photofading 116
Crystallinity changes, in natural and modified cellulosic fibres, infra-red spectroscopy 376
in synthetic fibres 340
Curing, electron-beam 84
Cyanine dyes, azotrimethine, synthesis of 334
– methine, near-infra-red absorbing 368
– – synthesis and spectra 368
– spectra 115
– substituted, synthesis of 115
Cyanines, synthesis, visible absorption, photosensitisation and antimicrobial activity of 290
Cyclotetraphosphates, binary, as colour thermostable products 251
– as special pigments 252
2-Cyano-4'-[*N,N*-bis-(β-hydroxyethyl)amino] azobenzene, crystal structure 78
3-Cyanoformazans, synthesis and dyeing characteristics 115
Czechoslovakian, textile industry (P)398

D

Damage mechanical, in peroxide bleaching of cotton 150
to wool, during carbonisation 118
in wool dyeing, effect of reactive dyes on (P)270
Data processing, colour (CDP), in integrated information system 35
– in output costing 34
storage, optical 200
Daylight simulators, for measurement of optical whiteners, assessment with a sphere spectrophometer 339
De-acidification, of paper 119
Decatising, pressure, of wool 374
Decolorisation, of effluents, by dye-inclusion compounds 256
Degradation, thermal, of nylon 36, 340
Dehairing systems 295
Denim 32
garment, processing, pollution source reduction in 373
– stone washing 151
simulated yarn dyed 336
Denkendorfer FA tester, for estimation of liquor pick-up during sizing 150
Desalting, of dye industry effluents 403
Desensitisation, transient, of opponent channels 152
Designs, detailed, made possible by laser engraver 402
Desizability, of water-soluble sizes 292
Desizing of cotton, fabrics, with enzyme and oxidising systems 82
– use of peroxidase for 254
effect on costs of effluent treatment in finishing plants 292
with water-soluble sizes, optimised 150
Desorption chemical ionisation, in the analysis of involatile textile dyes 369
of organic solvent after washing with benzyl alcohol emulsions 255
Detergents composition 149
environmental considerations 149
legal regulations 149
practical applications 149
for textiles 335
Deterioration, progressive, of textile materials 294
DHDMI, in crosslinking of cotton 118
Diazo sulphonates, for dyeing and printing of textiles 81
Diazotisation, of aromatic amines with glycol nitrite 194
Dichroic dyes 79
4-Diethylaminoazobenzene, photochemical trans-cis isomerisation 400
Diethylaminoethyl cellulose, as a reagent in tannin analysis 295
Diffusion of C.I. Reactive Blue 19 in cellulose 370
controlled dyeing rate curves, equations for 81
of cross-linking agents, in liquor and cotton fibre 402
of dyes, in nylon 371
– in wool, microscopical study (P)131
– – photometric assessment 401
6,11-Dihydrospiro[1]benzopyrano[4,3-*b*]indol-6,9′-9′-*h*-xanthenes 78
1,5-Dihydroxyanthraquinone, nitration products 115
1,8-Dihydroxyanthraquinone, nitration products 115
***o,o′*-Dihydroxyazo** dyes, Eriochrome series, and cationic surfactants 334
DIMENSA, mercerising unit 293
Dimer, contribution to the reaction and diffusion of C.I. Reactive Blue 19 in cellulose 370
Dimethyl sulphoxide, solutions, enthalpy of dyeing cellulose with Reactive Violet 4K in 254
Dimethyloldihydroxyethyleneurea, effect on cellulosic fibres 82
Direct dyeing, of cotton (P)245
– – fastness 371
– – nep coverage in (P)104, (L)248
– – yarn in the presence of hydrogen peroxide 79
– kinetics 335
dyes, adsorption on cotton 400
– for cellulosic fibres, substantivity problems 195
Discharge printing, on cellulosic fibres 150
– of laser pretreated polyester fabrics 254
– reduction of azo dyes in 373
– of wool and silk 81
zero, from indigo dyeing 195
Discrimination, visual, between white textiles 84
Dispensing, automatic, of dyes in a print works 373
Disperse dyes, azo, in carrier dyeing of polyester fibre 80
– dispersant-free, dyeing behaviour (P)283, (P)327
– fastness 32, 337
– – and chemical constitution 194
– from animophenyl-X-azolopyridines 78
– mixtures, in unlevel dyeing of polyester 80
– Palanil Violet 3B, EDTA as carrier for (F)25
– particle sizes in 339
– for polyester fibres 368
– printing of cellulose acetate fabrics with 81
– reactive, thermodynamic affinity and dyeing rate 80
– synthesis from acid dye structures 368
Disperse Yellow 232, structural features 368
Dispersing, agent, sorption by wool 371
Dispersions aqueous, of polyurethane ionomers 295
Hercosett/optical brightening agent, applied to wool 197
intensive drying of materials padded with 338
particle sizes in 339
polyurethane 295
Dissolution, of sizes 34
DMDHEU, in cross-linking of cotton 118
DMEU, combined dyeing and finishing with 32
Doctor blade, in rotary-screen printing 33
– techniques 149
technology in rotary screen printing 254
Driers, Autofloat 374
drum, contact drying on 82
Drying characteristics, of fabrics 293
high frequency, of felt 374
– of wool, yellowing during 117
intensive, of materials padded with dispersions and solutions 338
kinetics, for silk fabrics 293
rapid 293
rate constant 293
section, of sizing machine, energy requirement reduction 196
tumbler, of acrylic, modacylic and polypropylene fabrics 374
vacuum technology 293
Durability, of PVC 295
Durable, hard-finishing of cotton fabrics 373
Durable-press cotton, fabrics, predrying 255
– with methanolamine as additive 401
finishing, formaldehyde free 374
garment-dyed products 292
Dusting, behaviour, estimation of 33
Dye carriers, within poly(ethylrephthalate) fibres, electron microscopical analysis 339
colour, integrated data processing in the automated dyeing plant 375
couplers, oxidative 252
dispensing, automatic, in a print works 373
distribution, in fibre cross-sections, photometric assessment 401
flow, in capillary assemblies 81
jigs, modern 255
metering, continuous, in wool package dyeing 371
recovery, membrane filtration techniques for 403
solutions, magnetic activation in padding cotton fabrics with 400
sorption, by irradiated polyester 294
– by PET 199
staining, and removal of cationics from keratin 295
structure, effect on coverage of neps in cotton fabric (P)104
uptake, of bulked continuous filament nylon yarn 371
Dye-inclusion compounds, a new method for the decolorisation of effluents 256
Dyeability of aqueous-spun regenerated cellulosic fibres 335
of cellulose, improved 199
of cellulosic fibres, with reactive dyes 335
of cotton, cross-linked 118
– improved (P)307, (P)352
of nylon-6 fibres, grafted 119
of polypropylene, improved 199
of wool, changed by treatment 148
Dyeable polyester fibre, carrier-free, production and properties 294
Dyebath, aqueous, magnetic activation 116
effluents, indigo estimation in 197
pH, effect on colour yield in indigo dyeing of cotton denim yarn 253
Dyed and pigmented, materials, improved light fastness (P)135
Dyehouse automation 83
effluents, environmental aspects 33
energy use 83
experience, with tailing in cold batch dyeing with reactive dyes 252
improved correlation with dyeing laboratory 375
Dyeing of alkali-treated polyester fibres, with disperse dyes (P)385
application of ultrasonics 372
of bast fibres 116
batch, automation and quality in 151
– exhaustion and levelling 149
– – kinetics 116
– with reactive dyes, tailing in 252
– self-regulation 336
behaviour, of acrylic fibres, effect of spinning dope additives 254
– of cellulosic fibres, influence of shrinkage and mercerisation parameters on 335
– characterisation by dyeing indices 401
– of dispersant-free dyes (P)283, (P)327
carrier, of polyester fibre, with disperse azo dyes 80
of cellulose, with Reactive Violet 4K in aqueous and aqueous-dimethyl sulphoxide solutions, enthalpy of 254
of cellulosic materials, parameter estimation by liquid chromatography 370
of cellulosic/synthetic polymer fibre blends, with reactive dyes 370
characteristics, of 3-cyanoformazans 115
cheese, vat dyes in 148
and coating, continuous, of carpets 32
continuous, automation in 35
– of carpets 371
– of cellulosic fibres, with bifunctional reactive dyes 370
– on-line colorimetry in 403
– with Remazol dyes 116
– reproducibility in 401
– short run 370
– – procedures and equipment 374
– of wool, with chrome dyes 336
of cotton, durable press, with methanolamine as additive 401
– and polyester/cotton, in short liquor jet dyeing machines with reactive and disperse dyes 291
– sewing thread, economic 400
direct, of cotton, role of polyoxyethylenated stearylamines (P)245
– – yarn, in the presence of hydrogen peroxide 79
environmentally safe, with aerodynamic system 402
exhaust, of carpets 371
– of cellulose, with Procion H-EXL dyes 369
– of cotton, cost effectiveness in 370
– nonisothermal, of polyester fabrics 337
and finishing, by high-temperature steaming 80
– of cotton 370
– with DMEU and pyridinyltriazine reactive dyes 32
– equipment, manufacture 83
– liquid ammonia based 116
– machinery 83
– of nylon, effects of salts on 80
– padder for 35
– of polyester/cotton 80
– of textiles, irradiation in 370
– vacuum technology in 293
foam, of glass fabrics 80
garment 291
global trends 253
of hair, human 84
high-temperature, of polyester (P)283, (P)327
of immature cotton neps with a cationic polymer 371
indices, characterisation of dyeing behaviour by 401
indigo 401
– effect of dyebath pH on colour yield in cotton denim yarn 253
– sulphur and vat dyes, by the RD system 32
– zero discharge 195
industry, computer integrated manufacturing in 151
– effluents, concentration and desalting 403
– membrane processes for 375
– productivity and quality in 256
– quality assurance in 149
jet, Rapidaseu system 256
kinetics, for direct dyes 335
– from finite baths 400
laboratory 374
– improved correlation with dyehouse 375
of linen, and linen-type fabrics 80
for a living 404
low liquor, of plush and loop pile fabrics 375
machine, automation and quality in 118
– complete automation 375
– jet, for carpets 148
– overflow 82
machinery 83
and mercerising, simultaneous, with liquid ammonia 79
– – with vat dyes 79
microemulsions in 335
mordant, of jute 291
– of protein fibres 371
of nylon, complexes of acid dyes and triethylamine in 336
– effects of ultrasound 195
package 83
– of wool, with continuous dye metering 371
physico-chemical study of ultrasonics in 403
plant, automated, dye colour data processing in 375
of plush and loop pile fabrics in short liquor ratios 375
of polycaproamide fibres, with acid dyes 148
of polyester, by the electrostatic powder spraying process 372
– high temperature 80, (P)283, (P)327
– low temperature, with acid dyes 32
– with mixtures of disperse dyes 80
– and polyester/cellulosic blends 148
– speciality goods, with Then Airflow machine 403
of polyester/cotton, in short liquor jet dyeing machines with reactive and disperse dyes 291
– with vat dyes 80
preparation, quantification by near infra-red analysis 339
pressure 117
and printing, continuous, of cellulosic fibres 254
– ink jet systems for 81
– of textiles, Australian process 253
– – diazo sulphonates for 81
– of wool 401
problems, web-nep procedure for prediction of 256
process, control 256
– pad-dry, quality improvements in 375
– use of cotton yarn for colour removal in 255
properties, of azo dyes, effect of acylation on (P)54
– of grafted polyamide fibres 334
– of nylon 371
– of polyglycidylmethacrylate/nylon-6graft copolymerisation with acid and reactive dyes 253
– of reactive dyes, effect of thickeners 372
– of viscose, modal and carbamate fibres 256
of protein and polyamide fibres 80
range, pad-dye thermofixation 151
rate, correlation with thermodynamic affinity 80
– diffusion controlled, equations for 81
– of wool, effect of lipids 401
reactive, of cellulosic, fibres, exhaustion curves for 370
– of cellulosic/synthetic polymer fibre blends 370
– of cotton 32
– – reproducibility 290
– and disperse, of cotton, in short liquor jet dyeing machines 291
– mathematical analysis 195
– new chromophoric systems in 335
– with nonionic surfactants 335
– optimised 79
– of shrink-resist wool, effect of enzyme treatment on 336
– of viscose staple yarn 195
recipes 35
– and regimes, optimisation with new equipment 253
robotic 83
simultaneous, of silk and synthetic fibres (P)395
single stage, for polyester/cellulose blends 291
of speciality animal hairs 376
stone, of cotton fabrics 370
system, synchronous 336
of textile materials 252
thermal fixation, sorption of C.I. Disperse Blue 94 by polyester during 372
thermosol, migration during 253
unit, automatic 197
variables, for durable press cotton with methanolamine as additive 401
vat, at low liquor ratios 79
– in liquid ammonia 252
– optimised 79
winch, of wool by the integration system 253
winch-beck, of cut-pile carpets 116, 371
of wool, with acid dyes 80
– with chrome dyes 253
– effect of, electromagnetic water treatment on quality 116
– – reactive dyes on damage in (P)270
– – using monoethanolamide in 371
– levelling agents in 371
– recipe optimisation 80
of worsted fabrics 253
yarn 401
– measurement unit for 375
– using vacuum techniques 32
Dyeings deep, fastness to rubbing 253

of reactive dyes, washing-off 148
reduction of azo dyes in 373
reproducibility, improved 195
Dyers, young (C)377
Dyes absorption, structure effects 116
acid,in dyeing of nylon 336
– – of polycaproamide fibres 148
– – of polyester, low-temperature 32
– – of wool 80
– nonionic surfactants with 371
– on polyglycidylmethacrylate/nylon-6 graft copolymerisation with 253
– on silk, sorption isotherms 336
analysis, application-related 403
anthraquinone, bluish-green, for synthetic polymer fibres 290
– synthesis and properties (P)388
application, in combined dyeing and finishing of cotton 370
azo, azo-hydrazone tautomerism 194
– coloration of fabrics by synthesis of 116
– derived from 3-amino-7-nitro-2*H*1,2-benzothiazine 1,1-dioxide 290, 334
– disperse, in carrier dyeing of polyester fibre 80
– effect of acylation on dyeing and fastness properties (P)54
– interaction with bovine serum albumin 371
– – with surfactants 335
– – with water-soluble polymers 78
– nonmutagenic 251
– photochemical behaviour in polymeric matrices 337
– pyridine, NMR spectroscopy of hydrazone-azo tautomerism 400
– pyridone, photofading in solution 368
– reduction, in the stripping of dyeings and discharge printing 373
azomethine, reduction by ketyl radicals 78
basic, conformity to the Beer-Lambert law 401
– in printing, of acrylic fabric 33
– – of polyacrylic acid-cotton graft copolymers 372
cationic, from aminophenyl-X-azolopyridines 78
– synthesis from acid dye structures 368
for cellulosic fibres, interactions between 336
chrome, continuous process for dyeing wool with 336
– dyeing of wool with 253
commercial forms 337
cyanine, ß- and γ-substituted azotrimethine, synthesis of 334
– spectra 115
– synthesis of 115
dichroic 79
direct, adsorption on cotton 400
– for cellulosic fibres, substantivity problems 195
– in dyeing of cotton (P)245
– – yarn, in the presence of hydrogen peroxide 79
– dyeing kinetics 335
– fastness of cotton dyed with 371
– nep coverage by (L)248
disperse, azo, derived from 3-amino-7-nitro-2*H*1,2-benzothiazine 1,1-dioxide 290
– – NMR investigation of 251
– dispersant-free, dyeing behaviour (P)283, (P)327
– fastness 32, 337
– – and chemical constitution 194
– from aminophenyl-X-azolopyridines 78
– mixtures, in unlevel dyeing of polyester 80
– Palanil Violet 3B, EDTA as carrier for (P)25
– particle sizes in 339
– for polyester fibres 368, (P)385
– in printing of cellulose acetate fabrics 81
– spectral properties 251
– synthesis from acid dye structures 368
– in thermal treatment of triacetate fabric 291
fading, in nylon, effect of antimicrobial agents 371
fluorescent, flash photolysis studies 251
imidacyanine, with the very strong electron acceptor group, $CF_3S(O) = NSO_2CF_3$ 368
Indanthren, advantages of 336
indigo, dyeing by the RD system 32
indigoid, analysis by mass spectrometry (P)22
intraionic, based on substituted methyl quinolines, electronic absorption bands in 368
involatile, analysis by fast atom bombardment, and desorption chemical ionisation 369
Kayacelon React, for 100% cellulosics 291
ketocyanin, photochemistry of 400
leather, interactions with collagen (P)139
metallised, dyeing of wool with 80
methine, synthesis 115
methine cyanine, synthesis and spectra 368
monoazo, derived from 4-oxoquinazoline 368
– sulphonated, containing a trifluoromethyl group 78
monochlorotriazinyl, fading on cellulose under wet conditions 369
mordant, dyeing of jute with 291
new 148
nonionic, sorption and diffusion in nylon 371
o,o'-dihydroxyazo, Eriochrome series, interactions with cationic surfactants 334
organic, photostabilisation by nickel complexes 116
perylene 79
photostabilisation, effect of antioxidants (P)135
polymethine, electron donor ability 194
– in quantum electronics 115
powder, handling of 372
Procion H-EXL, for exhaust dyeing of cellulose 369
pyrylium trimethinecyanine 115
quality control 33, 84
reactive 148
– aftertreatments for wool dyed with 401
– application 369
– α-bromoacylamide, laser Raman studies (P)59
– on cellulose (P)230
– – fading 194, 369, 400
– on cellulosic fibres 335, 370
– on cellulosic/synthetic polymer fibre blends 370
– on cotton 32, 400
– disperse, sulphatoethylsulphonyl (P)395
– – thermodynamic affinity and dyeing rate 80
– dyeing with, optimised 79
– effect, on damage in wool dyeing (P)270
– – of enzyme treatment for shrink-resist wool 336
– – of thickeners on dyeing properties 372
– fixation, on cotton by cellulose thiocarbonate catalyst 290
– – efficiency 148
– hydrolysates, removal from effluents 197
– interactions with nonionic surfactants 335
– new chromophoric systems in dyeing with 335
– photodestruction 195
– pyridinyltriazine, in combined dyeing and finishing 32
– pyrimidyl, hydrolysis 79
– in strengthening of nylon goods 80
– sulphonyl, alcoholysis and hydrolysis 400
– tailing in cold batch dyeing 252
– triazinyl, hydrolysis product (P)230
– vinylsulphonyl, fading 115, 194, 400
– – sulphonated 79
– on viscose yarn 195
– washing-off of prints produced with 34
red, for synthetic-polymer fibres (P)275
Remazol, continuous dyeing with 116
selection, in gel dyeing of acrylic fibres 32
squarylium, photodegradation (P)181
sulphonylazide, thermal investigation 290
sulphur, dyeing by the RD system 32
– reuse by tangential microfiltration using ceramic membranes 370
synthetic, purification procedures 196
for transfer printing 256
vat, for cellulosic fibres, substantivity problems 195
– in cheese dyeing 148
– dyeing and mercerising with 79
– in dyeing of polyester/cotton 80
– dyeing with, optimised 79
– leuco, photochemistry of (P)321
– low liquor dyeing with 79
– print pastes 81
– RD system 32
– solubilised, printing with 81
– suspensions in liquid ammonia 252
Dyestuffs, determination of lightfastness by kinetic characteristics 368
how dangerous are they 402
liquid, for leather 119
producer, view of environmental protection and work hygiene 402
tolerances and tinctorial strength 151
violanthrone 79
Dynamic properties, of bubble films 336

E

Ecological considerations, for cationic aftertreatments 252
– in chromium management for tanneries 120
– in evaluation of sizing agents 291
– importance of reliable recipes 256
– in washing-off of dyeings 148
damage, to nylon 6, 199
Economic considerations, in dyeing of polyester and blends 148
– in recycling of sizing agents 196
– in textile finishing industry 118, 374
Education, and training, textile products and services for 375
Efficiency of fixation, of Procion T reactive dye on cotton 148
high, of surfactants 369
luminous, for brightness 198
Effluents anaerobic neutralisation 375
bleaching, AOX content 34
cleaning of 151
decolorisation, by dye-inclusion compounds 256
dyeing, concentration and desalting 403
– environmental aspects 33
– indigo estimation in 197
finishing, cleaning by ultrafiltration 197
– effects of desizing on treatment costs 292
– laboratory scale and bulk treatment 403
pollution, and sizing agents, as viewed by water authorities 339
removal of hydrolysates by precipitation/flocculation 197
tannery, water reclamation from 295
treatment 197
– anaerobic 375
– cost reduction by use of heat recovery unit 293
Electrical characteristics, of precipitation products of polyelectrolytes 290
Electrochemical methods, in the textile industry 336
Electrolyte, polymeric, in capillary assemblies 81
Electrolytically stable fatliquors 403
Electromagnetic treatment, of water, effect on quality of wool dyeing 116
Electron beam, curing and grafting 84
– induced polymerisation, in textile finishing 199
– irradiation, of polypropylene fabrics 294
– – – and grafting by acidic monomers 376
donor ability, of endgroups of polymethine dyes 194
microscopical analysis, of dye carriers within poly(ethylrephthalate) fibres 339
paramagnetic resonance (EPR) 116
Electronic absorption bands, in intraionic dyes based on substituted methyl quinolines 368
spectroscopy, in pigment identification (P)187
structure, of 2-amino-9,10-anthraquinone 79
Embossed effect, stable, production of 338
Energy recovery, membrane filtration techniques for 403
reduction, in drying section of sizing machine 196
use, in dyehouse 83
Enthalpy, of dyeing cellulose with Reactive Violet 4K in aqueous and aqueous-dimethyl sulphoxide solutions 254
Environmental considerations, in bleaching 34
– for complexing agents based on phosphonium acid 149
– for detergents 149
– for the evaluation and development of thickeners 149
– for heavy metal compounds 291
– legislation for UK ink manufacturers 254
– in mothproofing 81
– for paint 36
– in sizing 34, 291
– in tanning 402
– for textile auxiliaries 33, 335
protection, importance for textile finishing industry 402
– as seen by the dyestuff producer 402
safety, of aerodynamic dyeing 402
Enzymes in desizing of cotton fabrics 82
for the production of shrink-resist wool 336
in shrink-resistant treatment of wool 34
Eosin Y derivatives, synthesis and spectroscopic properties 251
ionisation and isomerisation constants 334
spectroscopic studies 334
Equations, for diffusion-controlled dyeing rate 81
Estimation of concentration of ionic surfactants 151
of dissolution speeds of sizes 34
of indigo, in effluents 197
of parameters in the dyeing of cellulosic materials by liquid chromatography 370
of trace elements 151
Ethylenediamine ethoxylated, effect on dyeing of polycaproamide fibres with acid dyes 148
reaction products, of polyamide-epichlorohydrin resins (P)352
tetra(methylene phosphonic) acid, as a carrier for disperse dye (P)25
European Community, flame retardant textiles in 33
newspaper printing industry 119
Evaporator, rotary, design 293
Exhaust dyeing, of carpets 371
– of cellulose, with Procion H-EXL dyes 369
– of cotton, cost effectiveness in 370
– of polyester fabrics, nonisothermal 337
Exhaustion in batchwise dyeing 149
– kinetics of 116
curves, in metering of salt in dyeing of cellulosic fibres with reactive dyes 370
Exhibitions G-Mex Centre Exhibition, Manchester (1990) 200
Otemas 35, 83, 151
Expert system, Texperto, for finishing 374
Extensibility, in coating with polyurethane dispersions 151

F

Fabrics coating of 118
monitoring, with image analysis 376
Fading effect of fluorescent whitening agents on silk 371
of reactive dyes 115
– on cellulose 194, 369
Fast atom bombardment, and desorption chemical ionisation in the analysis of involatile textile dyes 369
Fastness of azo dyes, effect of acylation (P)54
of cotton dyed with direct dyes 371
of disperse dyes 32, 194
of dyed leather 119
of pigment prints, on cotton dyed with reactive dyes 400
testing 256
to light, of dyed and pigmented materials (P)135
to rubbing, of deep dyeings 253
– of iron oxide particles 296
Fatliquors, electrolytically stable 403
Fault detection, by optical Fourier filter analysis 83
– in fibres and finishes, microscopic techniques 375
Felt, drying, in a high frequency field 374
Felt-free finishing, of wool 82
Ferromagnetic, properties, modification of synthetic fibres to achieve 294
Fibre blends, computerised dye-recipe prediction for 376
characteristics, importance in adhesion of sizes 196
structure, of causticised polyester 376
synthetic, in production of textiles and composites 84
translucency, effect on colour of blends of precoloured fibres 339
Filament yarn, nylon 371
– performance 84
Filing, of recipes 33
Filter, spring-type, in treatment of waste water 339
Filtration of activated sludge 339
dry, properties of textile fibres for 199
membrane, for recovery of dyes, chemicals and energy 403
Finishers, fabric 197
Finishes, for wood 120
Finishing cationic softeners in 374
chemical, dimensional stability of flat textiles obtained by 255
of cotton, foam systems for 196
crease-resist 81
– of cellulosic materials, formaldehyde free, with glyoxal 374
– of linen, with foam 150
durable-press, formaldehyde free 374
effect on wetting-out and physiological properties of textiles 374
effluent, cleaning by ultrafiltration 197
–, cotton, laboratory scale and bulk treatment 403
flame-retardant 255, 339
– of cotton, polyester and polyester/cotton fabrics 293
with foam, resource saving in 149
formaldehyde free 374
hard, of cotton fabrics 373
of high-tech textiles 82
industry, economic considerations 118
– effects of desizing on costs of effluent treatment 292
– European 293
– importance of environmental protection 402
– Italian 293
of leather, pigments in 252
– polyurethane cationomers for 36
physics of 255
processes, effect on mechanical properties of abrasive cloth 255
– use of infra-red radiation in 255
prospective developments 402

quality testing and assurance 375
reactive, of cotton with acrylamidomethyl starches 374
resin, computerised optimisation of 374
– zero and low-formaldehyde 374
specifications 35
with synthetic resin, computer-assisted optimisation 254
Texperto expert system 374
textile, electron-beam induced polymerisation in 199
– irradiation in 370
– physical aspects 151
and transfer printing, combined 254
vacuum extraction in 338
wash-and-wear, low-formaldehyde 292
water- and oil-repellent, effect on air permeability of cotton fabric 256
waterproof, use of magnetic activation in 255
of wool, felt-free 82
Fire and flame retardancy 35
– buyers' guide 290
– coating and finishing techniques 255, 339
– coatings 36
– of domestic textiles, in the EC 33
– in finishing of cotton, polyester and polyester/cotton fabrics 293
– of protective clothing 296
– standard for 196
– treatment, for knitted fabrics 118
– – for wool-containing fabrics 255
Fixation of reactive dyes, on cotton 148
– – by cellulose thiocarbonate catalyst 290
Flame retardant paints, tin-based 404
Flammability of polyester fibre, retention in textile printing 196
testing 198
of textile 296
Flash photolysis, of a sulphonated bis-styryl biphenyl fluorescent dye 251
Flexibility, increased, of dyeing range 151
Flexography, publication 84
Flock printing 81
Flocking, effect of the adhesive viscosity on disorientation of pile during 402
Floorcoverings, textile, atmospheric effects 33
Flow of foam, through screens (P)235
of print pastes 33
of water and dye, in capillary assemblies 81
Fluorescein, ionisation and tautomerism surfactant solutions 251
Fluorescence quenching, of fluoresecent surfactants 78
spectral properties, of α,o di 1- and 9-anthrylpoly-ynes 290
– of pyrimidine derivatives 115
Fluorescent brightening agents, triazinylaminostilbene, on cotton (P)49
coatings 295
collectors, perylene and violanthrone dyestuffs for 79
2,3-fused coumarin derivatives, synthesis of 334
white, measuring system 198
– spectrophotometry of 84
whitening agents, effect on silk phototendering and dye fading 371
Fluorination, surface, in improve adhesive properties of textiles 35
Foam application 337
– absorption and rheological phenomena 404
– from a closed system (P)142
bubble size distribution, determined by image processing 375
crease-resistant finishing of linen with 150
dyeing, of glass fabrics 80
flow, through screens (P)235
parameters 142
printing 81
processing, in carpet stain release 293
systems, colouring of tufted carpets with 80
– for finishing of cotton 196
Formaldehyde -free finishing, crease-resist, of cellulosic materials 374
– – durable-press 374
low finishing, resin 374
– – wash-and-wear 292
quantitative determination 375
– low levels 83
Formulation program, CRT colour monitor linked to 198
Fourier filter analysis, in fault detection 83
Fovea centralis, cone classes in 152
Fractal analysis, of organic pigment crystals 369
Fractionation, partial, of cellulose acetate 340
Free radical transformation, in photodegradation of reactive dyed textiles 335
Furazano[3,4-*b*]-1,4-diazepins 115
Future developments, of coloration industry (C)297
– in printing 34

G

G-Max Centre Exhibition, Manchester (1990) 200
Galactomannans, in textile printing 34
Galliotannins 295
Garment drying, machinery, buyers' guide 35
dyed products, durable-press 292
dyeing 291
– automated 35
– and washing, machinery, buyers' guide 375
washing techniques 370
Gel dyeing, of wet spun acrylic fibres 32
Geotextiles 294
weathering 376
Glass fabrics, foam dyeing of 80
– pigment printing of 196
Glycol nitrite, diazotisation of aromatic amines with 194
Glyoxal, as formaldehyde free agent in crease-resist finishing of cellulosic materials 374
Graft polymerisation, of acrylonitrile onto modified cellulosic material 199
Grafting of acidic monomers 294, 376
of cellulosic fibres 294
electron-beam induced 84, 199
of methacrylic acid, induced by potassium permanganate/citric acid system 373
Graphics monitor, accurate representation of colour on (P) 356
Green-blue, zirconium silicate pigment, synthesis 369
Groups, reactive functional, introduction into cellulose 294

H

Hair, coloration by melanin precursors 119
human, dyeing of 84
Halochromic molecules 78
– as chromogens for black images 251
Halochromism, in a hinopurpurin derivative 78
Halogen organic, in bleaching effluents 34
– formation in bleaching of cotton 254
Handle, of wool fabric, influence of scouring conditions on 34
Handling, of powder dyes 372
Hazardous substances, control of 372
Healthcare concerns, and antimicrobial-treated carpets 81
Heat energy, economising, in the textile industry 374
recovery unit, in treatment of textile effluents 293
setting, temperature, effect on bulk and dye uptake of bulked continuous nylon yarn 371
Heat setting, effects on PET 199
Heavy metals in the environment 291
use in textile wet processing 291
Hercosett/optical brightening agent dispersions, applied to wool 197
5-Hetarylpyrazolo[3,4-*b*]pyrazines, synthesis and use as disperse dyes 368
Heterocyclic compounds, thermochromism 115
High modulus filament yarns 84
performance fibres, for reinforcement of plastic components 294
performance liquid chromatography 151
tech textiles, contribution made by finishing 82
Hinopurpurin derivative, halochromism in 78
Hot melt lamination unit 151
Hue 151
display on CRT colour monitor 198
psychologically unique, in aperture and surface colours 198
HVI, testing of cotton 340
Hybrid, yarns, for high performance composites 199
Hydrodynamics, of rotary-screen printing 34
Hydrogen peroxide in bleaching of cotton 150
bleaching mechanism 338
in bleaching of wool, effect of urea on 82
dyeing cotton with direct dyes in the presence of 79
Hydrolysis alkaline, of polyester fibres 36
– of poly(ethylene terephthalate) materials 294
products, effects on fastness of reactive pigment prints on cotton 400
– of triazinyl reactive dye (P)230
of pyrimidyl reactive dyes, NMR study 79
of sulphonyl reactive dyes 400
Hydrophilic and hydrophobic fabrics, layered, water transmission in 340
polyurethanes in textile coating 402
Hydroxyacetone, dyeing by the RD system using 32
Hydroxy-arylamino-7*H*-benzimidazo-(2,1-*a*)benz(*d,e*)isoquinolin-7-ones (P) 275
2-Hydroxyethylmethacrylate, application to waste water 339
3-Hydroxy-2-naphthoic acid amides, synthesis of 115
Hygiene at work, application engineer's view 337
– dyestuff producer's view 402
Hypochlorite, bleaching, effect of sulphamic acid 117

I

Identification, spectroscopic, of pigments in paint systems (P)187
Image analysis, in textile fabric monitoring 376
processing, in determination of bubble size distribution in foam 375
Imidacyanine dyes, with the very strong electron acceptor group, $CF_3S(O) = NSO_2CF_3$ 368
Indanthran, dyes, advantages of 336
Indigo -metal, complexes, synthesis and structure 194
centenary 401
dyeing 32
– by the RD system 32
– of cotton denim yarn, effect of dyebath pH 253
– process and machine concepts 401
– with zero discharge 195
estimation, in effluents 197
past and present 404
printing with 33
Indigo - Carmine, oxidation by *N*-haloarenesulphonamidates, kinetics of 194
Indigoid chromophores 78, 115
dyes, analysis by mass spectrometry (P)22
Information, and communications system, integrated 35
Infra-red absorbing, pyrylium trimethinecyanine dyes 115
analysis, in quantification, of preparation before dyeing 339
microscopy, of textile samples 83
radiation, in finishing processes 255
spectroscopy, of crystallinity changes in natural and modified cellulosic fibres 376
– of PVC plastisols in transfer printing 117
of surface accessibility of cellulose 120
Initiators, in photosensitive systems, cobalt(III) complexes as 404
Ink manufacturing, proposed UK environmental legislation for 254
printing, technology 119
Ink jet systems, for dyeing and printing of textiles 81
Inks, printing, pigments for 369
– resins for 372, 376
– tall oil rosin derivatives for 119
Insect-resist agents, on wool, chemical analysis (P)241
Insecticide protection, of textiles, permanent and temporary 151
Instrumental, testing 293
Interactions, between azo dyes, and water-soluble polymers 78
– and surfactants 335
between collagen and leather dyes (P)139
between dye and auxiliaries 335
between dyes for cellulosic fibres 336
pigment-surfactant 400
ring stacking, in association of Eriochrome dyes and cationic surfactants 334
Intraionic dyes, based on substituted methyl quinolines electronic absorption 368
Introduction of reactive functional groups into cellulose by chemical modification under heterogeneous conditions 294
Iodine, sorption, by polyester 119
Ion, absorption, by acrylic fibres (P)18
Ionisation constants of Rose Bengal, Eosin Y and some derivatives, spectroscopic determination 334
in halogen substituted fluorescein in surfactant solutions 251
Iron, oxide particle, fastness to rubbing 296
Irradiation in bleaching, dyeing and finishing of textiles 370
electron beam, of polypropylene fabric, and grafting by acidic monomers 376
Isomerisation constants of Rose Bengal, Eosin Y and some derivatives, spectroscopic determination 334
kinetics, of azo dyes 337
– of 3'-nitro-4-diethylaminoazobenzene 78
photochemical, of 4-diethylaminoazobenzenes 400
Isopropyl alcohol, kinetics of carboxymethylation of cellulose in 340
Italian, textile finishing industry 293

J

Japanese chemical laws 337
management thinking 401
Jet drying, kinetics 293
dyeing, of cotton and polyester/cotton with reactive and disperse dyes 291
– machine, for carpets 148
– – Rapidsuau system 256
printing, of carpets 34
– machine 81
Jute dyeing, with mordant dyes 291
fabrics, bleached, effects of melamine-formaldehyde resin 373

K

Kawabata Evaluation System, for product development and quality control (P)64
Kayacelon React, dyes, for 100% cellulosics 291
Keratin, weathered, thermoanalytical characteristics 118
Kermes and cochineal dyeing (L)113, (L)114
a dying dye (P)191
Ketocyanin, dyes, photochemistry of 400
Ketones, polyene-bis-omega, omega', substituted 400
Ketyl, radicals, recombination 78
Kevlar, five times stronger than steel 403
Kier, solar-powered, for single-stage cotton preparation (P)98
Kinetics of alkaline hydrolysis of polyester fibres 36
of azo coupling reactions 194
of carboxymethylation of cellulose in an isopropyl alcohol system 340
characteristics, in determination of lighfastness of dyestuffs 368
of drying silk fabrics with air jets 293
of dyeing, with direct dyes 335
– from finite baths 400
of exhaustion and levelling in batchwise dyeing 116
of fabric washing process, algorithm for 292
of isomerisation, of 3'-nitro-4-diethylaminoazobenzene 78
of oxidation of Indigo Carmine by *N*-haloarenesulphonamidates 194
of photofading of azo pyridone dyes in amide solvents 368
of pick-up and levelling in batchwise methods 253
of thermal cis-trans isomerisation of azo dyes 337
of thermal decomposition of alkali-treated cellulose 199
Knitted fabrics compressive shrinkage 119
flame-resist treatment 118
Knitting, of wool 35

L

Laboratory dyeing 374
scale, and bulk treatment, of cotton and cotton blend finishing effluents 403
to bulk reproducibility 148
Lamination unit, hot melt 151
Laser, carbon dioxide, use in strengthening of pile fabrics 36
engraver, enables finar detail of designs 402
pretreatment, of polyester fabrics 254
Raman studies, of reactive dyes on wool (P)59
Latexes, thickened, use in pigment printing of glass fabrics 196
Lavsan, (polyester), unlevelness in dyeing 80
Leather automotive 295
chemists, societies for 200
dyed, fastness properties 119
dyes, interactions with collagen (P)139
finishing, pigments in 252
– polyurethane cationomers for 36
liquid dyestuffs for 119
physical properties 295
produced by chrome liquor recycling 200
reactive silicones for 295
Legislation for detergents 149
Japanese, chemical 337
Let's blow our trumpet! (C)1
Levelling agents, in the dyeing of textured multifilament nylon 336
– in wool dyeing 371
kinetics, in batchwise dyeing 116, 149, 253

Ligands, Pt and Pd, indigo-containing 194
Light fastness, of dyestuffs, determination by kinetic characteristics 368
– of velour automobile upholstery, surface abrasion testing 375
Lignin, component, of bast fibres 116
Linen fabrics, radiation modification 199
finishing, crease-resistant, with foam 150
industry, automated recipe prediction for 198
and linen-type fabrics, dyeing 80
Lipids, effect on dyeing rate of wool 401
Liquid chromatography, high performance 151
crystalline, side chain polymers 79
treatment, of textile material 292
Liquor flow, effect on exhaustion and levelling in batchwise dyeing 149
low, in dyeing, with vat dyes 79
parameters, in adhesion of sizes 196
pick-up, during sizing, estimation of 150
quality, in wool scouring 197
washing off, indigo estimation in 197
waste, utilisation of 197
Loop pile, fabrics, dyeing, low liquor ratio 375
Lubrication, of yarn 35
Luminance channels, human 152
– separate 198
Luminescence, of copy-resistant-paper 120
Luminosity, function, physical basis 152
Luminous, efficiency, for brightness 198

M

Machine parameters, in foam application (P)142
Machinery developments 293
sizing 117, 291
Magnetic activation, of aqueous dyebaths 116
– in padding cotton fabrics with dye solutions 400
– in waterproof finishing 255
roll, technology, in rotary screen printing 33, 149, 254
Market, international (P)398
Marketing, textile products and services for 375
Materials handling, systems, for automated garment dyeing 35
Mathematical modelling, of reactive dyeing 195
Measurement of colour 84, 256
– values 35
of low levels of formaldehyde 83
of printing screens 254
of sharpness of print outlines 33
spectroscopic, of accessibility to surface of cellulose 120
unit, for yarn dyeing and its importance for the colourist 375
Measuring system, for fluorescent white 198
techniques on sizing machines 339
Mechanical, properties, of abrasive cloth, effect of finishing, processes 255
Mechanism, of hydrogen peroxide bleaching in scouring processes 338
Melamine acrylated, in ultraviolet-curable coatings 340
formaldehyde, resin, effect on properties of bleached jute fabrics 373
Melanin, precursors, in coloration of hair 119
Membrane composite, for ultra- and nanofiltration 403
filtration, techniques for recovery of dyes, chemicals and energy 403
processes, for textile and dyeing industries 375
Mercerisation 81, 82
cold and hot, roller mercerising unit for 402
DIMENSA, European, textile finishing industry 293
effect of fabric structure on 150
parameters, effect on structure and dyeing behaviour of cellulosic fibres 335
processes, automated laboratory assessment 292
slack, of open-end doubled yarns 254
Metal ions, effect on interaction between bovine serum albumin and an azo dye 371
Metallic powders, printing with 149
Metallisation of fabric 293, 338
Metallised dyes, dyeing of wool with 80
Metallophthalocyanine derivatives, photoelectric effect 194
Metering unit, microprocessor controlled 35
Methacrylic acid, grafting, induced by potassium permanganate/citric acid system 373
Methanolamine, as additive for durable press cotton 401
Methine dyes, synthesis 115
Methylene chloride–water–lecithin system, in scouring of wool fabric 338
***N*-Methylnaphthalimidoazobenzene** derivatives, spectral properties 251
1-Methylquinoxalinium toluene-4-sulphonate, syntheses with 78
Microemulsions, possible applications in dyeing processes 335
Microfibres, Trevira 403
Microfiltration, using ceramic membranes, in reuse of sulphur dyes 370
Microlevelness, of wool 291
Microprocessor control, of metering unit for dispensing chemicals 35
Microscopy of diffusion pathway of dyestuffs into wool (P)131
infra-red, of textile samples 83
in quality assessment and recognition of faults in fibres and finishes 375
Microstructure, of amorphous polymeric matrices 337
Migration in bulk dyeing 253
during thermosol dyeing 253
Miracle, – what miracle? (C)37
Modacylic, fabrics, tumbler drying 374
Modal, fibres, dyeing properties and processing 256
Modelling of colour vision 152
of contact drying on drum driers 82
mathematical, in production of fashion colours on wool 84
Modification chemical, of cellulose 199, 294
of cotton, to improve dyeability (P)307, (P)352
of linen fabrics, by radiation 199
of PET 199
of polypropylene, in electron-beam induced grafting reactions 199
solvent-induced, of poly(ethylene) terephthalate filament 36
of synthetic fibres, to achieve conductive, ferromagnetic and other properties 294
of wool, by plasma 118
Modifiers, for improving dyeability of polypropylene 199
Monoazo dyes, derived from 4-oxoquinazoline 368
– sulphonated, containing a trifluoromethyl group 78
Monochlorotriazinyl, dyes, reactive, on cellulose, catalytic fading under wet conditions 369
Monoethanolamide, in dyeing of wool, effect on the spinning process 371
Monomers, acidic, grafting of 294
Mordant dyeing, for protein fibres 371
Mothproofing, environmental conaiderations 81
Multifunctional, surfactant system 32
Museum, of textile printing, Swiss 34
Mutagenic, properties, of C.I. Direct Black 17, 251

N

Nanofiltration, composite membranes for 403
Naphthazarin, alkylamination 115
Neps, cotton, coverage of (P)104, (L)248
Neural, systems, distinguishing chromatic/achromatic contrasts 198
Neurons, second-order, in the turtle retina 152
Newspapers colour in (P)15
printing, industry, European 119
Nickel complexes, bis(1,2-diaryl-1,2-ethylenedithiolato), synthesis and crystal structures 116
dithiolene complexes, thin layers of (P)363
Nitration, of anthraquinones 115, 116
2-Nitro-4'-[*N*,*N*-bis-(ß-hydroxyethyl)amino]azobenzene, crystal structure 78
3'-Nitro-4-diethylaminoazobenzene, isomerisation kinetics 78
Nitrogen, oxide, influence on degradation of nylon 36
NMR spectroscopy, of azo disperse dyes 251
– of azo-hydrazone tautomerism 78
– – of fluorine-containing azo dyes 194
– – of pyridine azo dyes 400
– of hydrolysis of pyrimidyl reactive dyes 79
– of 2,2,2]cyclophane-1,2-dione monoarylhydrazones 290
– of monosubstituted chromotropic acids 148
Nonionic, dyes, sorption and diffusion in nylon 371
Nonisothermal, exhaust dyeing, of polyester fabrics 337
Nonlinearity of response function and adaptation 198
of visual receptor responses 198
Nonshrink, wool fabrics, washing using surfactants 117
Nonwovens 294
colouring of 2:1
polypropylene material, printing of 373
Numerical, methods, for shade sorting (P)315
Nylon -6, carpet, stain resist chemistry in 255
– 6,6, damage by thermal and ecological action 199
-6, dyeing, effects of ultrasound 195
– fibres, grafted, dyeability of 119
– 6,6, yarns, degree of set, and deset 340
carpet, performance 296
dye fading, and fibre yellowing, effect of antimicrobial agents 371
dyeing, complexes of acid dyes and triethylamine in 336
– and thermoanalytical properties 371
goods, strengthening, by use of reactive dyes 80
photodegradation and photostabilisation 36
properties, in dyeing and electrostatic finishing 80
sorption and diffusion of nonionoc dyes in 371
textiles, photodegradation, and thermal degradation 36
textured multifilament, acid dyes and levelling agents in dyeing of 336
thermal bonding 84
yarn, bulked continuous filament, bulk and dye uptake 371

Photodestruction, of reactive dyes in solution 195
Photoelectric effect, of metallophthalocyanine derivatives 194
Photofading of Crystal Violet lactone 116
kinetics, of azo pyridone dyes in solution 368
of vinylsulphonyl reactive dyes on cellulose under wet conditions 400
Photographic activity, of pyrazolone colour couplers 115
printing, use of esters of leuco vat dyes in (P)321
Photometric, assessment, of dye distribution in fibre cross-sections 401
Photon correlation spectroscopy, of dye dispersions 339
Photophysical characteristics, of some 2-styrylindolium dyes 252
Photosensitisation, of butadienochromophoric chain-substituted asymmetric cyanines 290
Photosensitising, properties, of triazylaminostilbene fluorescent brightening agents (P)49
Photosensitive systems, cobalt(III) complexes as initiators 404
Photostabilisation of dyes and pigments, effect of antioxidants on (P)135
of nylon 36
of organic dyes, by nickel complexes 116
of wool, with Cibafast W 369
Photostability, of triazylaminostilbene fluorescent brightening agents (P)49
Phototendering, of silk, influence of fluorescent whitening agents 371
Phthalocyanines, intermediates and pigments, synthesis 290
octasubstituted 79
Physical aspects, of textile finishing 151
Physico-chemical properties, of dispersions applied to wool 197
study, of ultrasonics in textile dyeing 372, 403
Physics of dyestuffs 337
of textile finishing 255
Physiological properties, of finished textiles 374
Pigments, anticorrosive 334
binders, radiation-curable, for textile substrates 338
for colour copiers and colour printers 290
crystals, organic, fractal analysis 369
interactions, with surfactant 400
in modern leather finishing 252
phthalocyanine, synthesis 290
printing, compositions for 196
– of glass fabrics 196
– special effects 81
for printing inks 369

printing of knitted fabrics with on a rotary screen machine 337
prints, on cotton dyed with reactive dyes, effects of hydrolysis products on fastness 400
quality control 84
quinacridone, spectroscopic identification (P)187
silaca-based, water-dispersible synthesis and characterisation 400
special, binary cyclotetraphosphates as 252
– tetrametaphosphates as 116
in specialised coatings applications 252
titanium dioxide, opacity 334
– surface studies 79
zirconium silicate, brown 400
– pink-violet, synthesis from zircon mineral 334
– synthesis 369
Pile disorientation during flocking, effect of adhesive viscosity on 402
fabrics, strengthening by laser radiation 36
Pink-violet, zirconium silicate pigment, synthesis from zircon mineral 334
Plasma activation, of textile materials 150
low temperature, and increase in colour depth 371
– in treatment of wool fibres 255
modification, of wool 118
Plasma-chemical treatment, of wool fabrics before printing 151
Plastic components, reinforcement by high performance fibres 294
money 119
Platinum compounds, containing indigo anions 194
Plush fabrics, dyeing, low liquor ratio 375
Pollution atmospheric, in welding of PVC coated fabrics 117
source reduction in denim garment processing 373
Polyacrylic acid/cotton, graft copolymers, printing with basic dyes 372
Polyacrylonitrile fibres, X-ray studies on 340
Polyamide fibres, absorption of pyrazolone acid dyes by (P)110
– dyeing, high temperature 80
– grafted, dyeing properties 334
– printing of 337
Polyamide-epichlorhydrin resins, pretreatment of cotton with (P)307
– reaction products (P)352
Polyamides, sorption of water vapour by 340
Poly(butyleneterephthalate) bulked continuous filament carpet yarn from 294
fibre 294
Polycaproamide fibres, dyeing with acid dyes 148
Polycyclic compounds 368
Polyelectrolyte precipitation products, electrical characteristics 290
Polyester, antistatic 294
bright blues and greens on 370
causticised, characterisation of the fibre structure 376
dyeing 148
– by the electrostatic powder spraying process 372
– high-temperature (P)283, (P)327
– low-temperature, with acid dyes 32
– unlevel, with mixtures of disperse dyes 80
fabrics, finishing, flame-retardant 293
– laser pretreated, discharge printing 254
– nonisothermal exhaust dyeing 337
– surface properties 340
– treatment with alkali 82
fibres 368
– alkali-treated, dyeing and colour characteristics (P)385
– alkaline hydrolysis 36
– carrier dyeing, with disperse azo dyes 80
– carrier-free, dyeable, production and properties 294
– flammability, retention in textile printing 196
– 5-hetarylpyrazolo[3,4-*b*]pyrazines as disperse dyes for 368
irradiated, structural changes 294
sorption, of C.I. Disperse Blue 94 during thermal fixation dyeing 372
– of iodine by 119
speciality goods, dyeing with Then Airflow machine 403
yarn, degree of set and deset 340
– high temperature dyeing of 80
Polyester/cellulosic blends, dyeing 148
– – one-stage 291
– printing 372
Polyester/cotton blends, bright blues and greens on 370
dyeing, and finishing 80
– in short liquor jet dyeing machines with reactive and disperse dyes 291
– with vat dyes 80
fabrics, flame-retardant finishing 293
– preparation 338
printing, and washing 117
treatment, alkaline 117
Polyethylene fibres, high performance 36
Poly(ethyleneterephthalate), fibres, electron microscopical analysis of dye carriers within 339
filament, structural modification 36
materials, alkaline hydrolysis 294
Polyglycidylmethacrylate/nylon-6, graft copolymerisation, dyeing properties 253
Polyheteroarylene fibres, scouring of 82
Polymer-fibre bond, in coatings 151
Polymeric coatings 84
matrices, photochemical behaviour of azo dyes in 337
Polymerisation electron-beam induced 199
graft 199
Polymers, conducting 120
emulsion, crosslinking with zircon chemicals 84
fibres 84
high performance, and carbon fibres 199
liquid crystal side chain 79
networks of, as primers for steel 120
structure, effect on the stability of blocked polyurethanes 376
synthetic, used in warp sizing 252
thermotropic 36
water-soluble, interaction with azo dyes 78
Polymethine dyes, electron donor ability 194
– in quantum electronics 115
Polynosic, fibres 340
Poly(*p*-phenylene sulphide), fibre 36
terephthalamide)/nylon-6, blends, phase separation in 340
Polypropylene, dyeability, improved 199
fabrics, electron beam irradiation and grafting 294
– – by acidic monomers 376
– tumbler drying 374
fibres 199
– thermobonding behaviour 376
material, non-woven, printing of 373
modification by electron-induced polymerisation 199
Polyurethane, blocked, effect of polymer structure on stability 376
cationomers, for leather finishing 36
– as retanning materials 295
dispersions 295
– coating with 151
hydrophilic, in textile coating 402
ionomers, aqueous dispersions 295
transfer coating with 402
Poly(vinyl alcohol), cross-linking of (P)321
size, washability 292
Poly(vinyl chloride), coated fabrics, welding of 117
outdoor durability 295
plastisols, used in transfer printing, infra-red spectroscopy of 117
Pore structure, of crosslinked cotton 118
Postpress processing 337
Potassium permanganate/citric acid system, grafting of methacrylic acid induced by 373
Potentiometric study, of nitration of anthraquinone 116
Powder, metallic, printing with 149
spraying process, for dyeing of polyester 372
Precipitation /flocculation, in removal of hydrolysates from textile effluents 197
products, of polyelectrolytes 290
Precoloured fibres, effect of fibre translucency on colour of blends 339
Prediction of colour appearance, under various viewing conditions 198
of colour matching 35
Predrying, of durable-press cotton fabrics 255
Preparation of 2-aryl, 2-hetaryl- and 2-styrylbenzothiazoles 251
before dyeing, quantification with near infra-red analysis 339
of cotton, single stage (P)98
– surface energy changes during 196
of natural silk 82
of polyester/cotton fabrics 338
Pressure decatising, of wool 374
dyeing 117
Pretreatment of cotton, knitted fabrics 292
– with a resin thiourea derivative (P)307
– with thiourea resin derivative (P)307
and dyeing, of speciality animal hairs 376
effect on transfer printing of wool and wool/polyester fabrics 372
laser, of polyester fabrics 254
of textiles 338
Primers, for steel, polymer networks as 120
Print, outlines, sharpness of 33
pastes, application, in rotary screen printing 33, 149
– rheology and quality assessment 33
– vat dye 81
– voltametric examination, of stability of reducing agents in 402
works, automatic dispensing of dyes in 373
– use of data processing in output costing 34
Printed fabrics, reactive, quality 117
Printers, colour, pigments for 290
– thermal wax 81
Printing of acrylic fabric, with basic dyes 33
of aromatic polyamide fibres 337
of cellulose acetate fabrics, with disperse dyes 81
colour kitchen in 339
of cotton, using carbamoylethyl starch in vat dye print pastes 81
discharge, of laser pretreated polyester fabrics 254
– reduction of azo dyes in 373
– and resist, on cellulosic fibres 150
– of wool and silk 81
of fabric 373
– surfactant effects in 149
and finishing, combined 254
– with foam, resource saving in 149
flock 81
foam 81
future 34
with indigo 33
industry, newspaper, European 119
inks, pigments for 369
– resins for 372, 376
– tall oil rosin derivatives 119
– technology 119
jet 81
of knitted fabrics, with pigments on a rotary screen machine 337
machinery 373
with metallic powders 149
museum, Swiss 34
of non-woven polypropylene material 373
photographic, use of esters of leuco vat dyes in (P)321
pigment, compositions for 196
– of glass fabrics 196
– special effects 81
of polyacrylic acid-cotton graft copolymers, with basic dyes 372
of polyester/cellulosic blends 372
rotary screen, application of print pastes in 33
– hydrodynamics 34
– machinery 196
– with pigments on knitted fabrics 337
– print paste application in 149
screen, colour control in 373
screens, measurement of 254
with solubilised vat dyes, and crease-resistant finishing 81
textile 149
– with the Basactiv system 254
– CAD system in 34
– galactomannans in 34
– ink jet systems for 81
– perfection in 33
– quality assurance in 34, 149
– retention of flammability during 196
thickeners, rheological behaviour 373
– synthesis and application of 373
– for transfer print paper 372
transfer, of cotton warp yarn 372
– dyes for 256
– and finishing 254
– PVC plastisols used in 117
– of warp yarns 81
– wool and wool/polyester fabrics, effect of pretreatments 372
and washing, of polyester/cotton 117
of wool 401
– fabrics, after plasma-chemical treatment 151
Prints produced with reactive dyes, washing-off 34
quality, technical 149
Process control buyers' guide 256
in dyeing 256
Processing, of denim garments, pollution source reduction in 373
postpress 337
textile, environmentally acceptable auxiliaries 335
– physical aspects 294
of wool, dyed and undyed 36
Procion H-EXL dyes, for exhaust dyeing of cellulose 369
T, reactive dye, fixation efficiency on cotton 148
Product development, use of Kawabata Evaluation System for (P)64
Production and properties, of carrier-free dyeable polyester fibre 294
standardisation, textile products and services for 375
Productivity increased, of dyeing range 151
in textile finishing industry 118
Properties of textile fibres for dry filtration 199
Protein fibres, dyeing, low temperature 80
– mordant 371
Pseudomonas stutzeri, azo dyes from (P)280
Purification, of synthetic dyes, by flash chromatography 195
PVA *see* poly(vinyl alcohol)
PVC *see* poly(vinyl chloride)
Pyrazolone acid dyes, absorption by polyamide fibres (P)110
colour couplers, structure and photographic activity 115
Pyrethroids, chemical analysis (P)241
Pyridine azo dyes, NMR spectroscopy of hydrazone-azo tautomerism 400
Pyridinyltriazine, reactive dyes, combined dyeing and finishing with 32
Pyridone azo dyes, photofading in solution 368
Pyrimido[5,4-*d*]pyrimidine, derivatives, synthesis and spectral properties 115
Pyrimidyl reactive dyes, hydrolysis 79
Pyrylium trimethinecyanine dyes, near-infra-red absorbing 115

Q

Quality assessment, of fibres and finishes, microscopy in 375
– of print pastes 33
assurance, in dyestuff and auxilary industries 149
– importance of colorimetry 35
– techniques 404
– for textile auxiliaries 151
– of textile dyes 33
– in textile printing 34, 149
and automation, in batchwise dyeing 151
– in machine dyeing 118
in carpet dyeing 371
control, for dyestuffs and pigments 84
– and process control in dyeing 256
– textile products and services for 375
– use of Kawabata Evaluation system in (P)64
– of water 197
improvements, in pad-dry dyeing processes 375
products for performance testing 375
of reactive printed fabrics 117
technical, of prints 149
testing, and assurance, in finishing 375
of textiles, improved by water technology 339
Quantification, of preparation before dyeing, with near infra-red analysis 339
Quantitative determination, of formaldehyde 375
Quantum electronics, polymethine dyes in 115
Quinacridone pigments, in vehicle paint systems, spectroscopic identification (P)187
Quinoid chromophores 78, 115
Quinolines, 4-methyl, oxy-substituted, intraionic dyes based on 368
Quinoxalines, for quinoid and indigoid chromophores 78, 115

R

R&D management, and innovation 120
profitable 120
Radiation, modification of linen fabrics 199
Rain-protective, fabrics 197
Raising, and singeing processes, control of 255
Rapidsuau system, for jet dyeing 256
Reaction, and diffusion, of C.I. Reactive Blue 19 in cellulose 370
Reactive dye, fixation efficiency 148
dyeing, mathematical analysis 195
dyes 148
– application 369
– for cellulose (P)230
– on cellulose, catalytic fading 194
– disperse, thermodynamic affinity and dyeing rate 80
– dyeability on cellulosic fibres 335
– dyeing of cotton with 32
– – of viscose yarn with 195
– – with, optimised 79
– effect on damage in wool dyeing (P)270

– hydrolysates, removal from effluents 197
– interactions with nonionic surfactants 335
– new chromophoric systems in dyeing with 335
– photodestruction 195
– pyridinyltriazine, combined dyeing and finishing with 32
– pyrimidyl, hydrolysis 79
– in strengthening of nylon goods 80
– triazinyl, hydrolysis products (P)230
– vinylsulphinyl, fading of 115
– vinylsulphonyl, sulphonated 79
– washing-off of dyeings with 148
– washing-off of prints produced with 34
finishes, for cotton 374
printed fabrics, quality 117
silicones, for leather 295
Reactive dyed textiles, free radical transformation in photodegradation of 335
dyeing of cotton, reproducibility 290
dyes, aftertreatments for wool dyed with 401
on cellulose, fading under wet conditions 369
continuous dyeing of cellulosic fibres with 370
dyeing of cellulosic/synthetic polymer fibre blends with 370
effect, of enzyme treatment for shrink-resist wool 336
– of thickeners on dyeing properties 372
fading, on cellulose 369
sulphonyl, alcoholysis and hydrolysis 400
vinylsulphonyl, photofading on cellulose under wet conditions 400
Violet 4K, enthalpy of dyeing cellulose with in aqueous and aqueous-dimethyl sulphoxide solutions 254
Recipe availability 35
filing 33
prediction, automated, for the linen industry 198
– computerised, for intimate fibre blends 376
– in textile coloration 118
Recipes optimised, in colour decisions 36
– for dyeing of wool 80
reliable, importance for optimised and ecological working 256
Reclamation of water, from tannery effluent 295
Recovery of dyes, chemicals and energy, membrane filtration techniques for 403
of sizing agents 34
of starch sizing agent 252
Recycling of chrome liquor in leather production 200
of sizing agents, technical and economic aspects 196
of water 197
Red dyes, for synthetic-polymer fibres (P)275
Red–green opponent-colour system 152
Redox system, in low temperature dyeing of protein and polyamide fibres 80
Reducing agents, in print pastes, voltametric examination of stability 402
Reduction of azo dyes in the stripping of dyeings and discharge printing 373
Refine Dyeing (RD) system, dyeing by 32
Reflectance, surface, statistical technique for measurement 403
Regulations for dyehouse effluents 33
safety 117
Reinforcement of plastic components, by high performance, fibres 294
Remazol dyes, continuous dyeing with 116
Repeatability and reproducibility, of test methods 83
Representation, accurate, of colour on a CRT monitor (P)356
Reproducibility in continuous dyeing, Japanese approach 401
of dyeings, improved 195
of laboratory results in bulk 148
in reactive dyeing of cotton 290
Research association, role of 296
Colorstar systems for 375
and development, profitable 404
textile products and services for 375
Resin finishing, computer-assisted optimisation 254
– computerised optimisation of 374
– zero and low formaldehyde 374
Hercosett, padding woollen fabrics with 255
melamine-formaldehyde, effect on properties of bleached jute fabrics 373
polyamide-spichlorhydrin, and reaction products (P)352
– thiourea derivative (P)307
for printing inks 372, 376
Resist printing, on cellulosic fibres 150
Resource saving in printing and finishing with foam 149
in textile industry 83
Response, visual, non-linear 198
Retanning materials 295
Retina, chromatic information processing in 152
opponent interactions in 152
Reuse of sulphur dyes, by tangential microfiltration using ceramic membranes 370
Review of numerical shade sorting methods (P)315
Reviews of books
"A practical introduction to the continuous dyeing of woven fabrics" by J Park and S S Smith (I Holme) 249
'Farbstoffe für Lebensmittel (Colorants for Foods)' by DGF Dyestuff Commission (G Hallas) 399

report of Examinations Board 75
reports 12, 47, 48, 96, 97, 130, 171, 173, 228, 269, 306, 350, 351, 383, 384
student members 29
subjects covered by the Journal 31
Softeners, cationic, in textile finishing 374
Soiling, of carpets 120
Solar-powered kier, for single-stage cotton preparation (P)98
Solid peroxides, in textile production 82
Solubilised vat dyes, printing with 81
Solubility tests, characterisation of cellulose derivatives by 340
Solutions, aqueous, of dispersant-free disperse dyes, dyeing behaviour of (P)283, (P)327
intensive drying of materials padded with dispersions and 338
Solvatochromic cyanine dyes 115
Solvent, effects, on electronic structure of 2-amino-9,10-anthraquinone 79
– on isomerisation kinetics of 3'-nitro-4-diethylaminoazobenzene 78
– on recombination of ketyl radicals 78
– on reduction of azomethine dyes 78
– on silk fibroin 340
organic, desorption after washing with benzyl alcohol emulsions 255
Solvent-induced modification of poly(ethylene terephthalate) filament 36
Solvent-spun cellulosic fibre 256
Sorption of C.I. Disperse Blue 94, by polyester during thermal fixation dyeing 372
and diffusion, of nonionic dyes in nylon 371
of a dispersing agent by wool 371
isotherms, of acid dyes on silk isotherms, sorption, of acid dyes on silk 336
of water vapour, by polyamides 340
Special effects, in pigment printing 81
Interest Groups (L)289
Specifications for finishing 35
Spectrometry, mass, of indigoid dyes (P)22
Spectrophotometry, of fluorescent whites 84
sphere, in assessment of daylight simulators for measurement of optical whiteners 339
Spectroscopy, absorption, of butadienochromophoric chain-substituted asymmetric cyanines 290
of asymmetric trimethine cyanine dyes 368
of cyanine dyes 115
of disperse dyes 251
in identification of pigments in vehicle paint syustems (P)187
infra-red, of crystallinity changes in natural and modified cellulosic fibres 376
of *N*-methylnaphthalimidoazobenzene derivatives 251
NMR, of hydrazone-azo tautomerism of pyridine azo dyes 400
photon correlation, of dye dispersions 339
of Rose Bengal and Eosin Y derivatives 251, 334
Spinning, dope additives, effect on dyeing behaviour of acrylic fibres 254
of wool, into ring spun yarn 36
Spirocyclic compounds, thermochromism 115
Spiro[3*H*-1,4-oxazine], photochromic 251
Sports and leisure wear 82
Squarylium dyes, photodegradation of (P)181
Stabilisers, for nylon-6 199
SIFA liquid 338
Stability of blocked polyurethanes, effect of polymer structure 376
dimensional, of flat textiles obtained by chemical finishing 255
of plasma activation of textile materials 150
of reducing agents in print pastes, voltametric examination 402
Stain release, in carpets, by foam processing 293
resist, chemistry, in nylon-6 carpet 255
– treatment, of wool 197
– – , of carpets 255
Standard, for flame-retardancy 196
Starch, acrylamidomethyl, as reactive finish for cotton 374
carbamoylethyl, printing of starch with 81
size, in loomstate cotton fabric 373
sizing agent, recovery and/or treatment 252
Statistical technique, for estimating surface reflectance 403
Steaming, high temperature, for cross-linking, of cotton fabric treated with DMDHEU 254
– in dyeing and finishing 80
unit, combined, pretreatment of cotton knitted fabrics 292
Stearylamines, polyoxyethylenated (P)245
Steel, primers for 120
Stickiness of sizes, factors affecting 196
Stone dyeing, of cotton fabrics 370
washing, of denim garments 151
Strength, tensile, effect of acid treatment on 294
Strengthening of nylon goods, by use of reactive dyes 80
of pile fabrics by laser radiation 36
Structure of azobenzene-containing amphiphiles 194
of cellulose fibres, 294
– influence of shrinkage and mercerisation parameters on 335
of fabric, effect on mercerisation 150
and formation, of thermal degradation products of nylon 340
of Pd(II) and Pt(II) compounds, containing indigo anions 194
of polyester 294
transformations, in acrylic fibres 376
Structure/activity relationship, of pyrazolone colour couplers 115
in dye absorption 116
Structure/property relationships, in polymeric coatings 84
2-Styrylindolium dyes, photophysical characteristics 252
Substantivity of anionic surfactants applied to wool 195
of direct and vat dyes for cellulosic fibres 195
Substrates, non-standard, accuracy of match prediction 376
Sulphamic acid, efect on bleaching with hypochlorite 117
Sulphatoethylsulphonyl, reactive disperse dyes (P)395
Sulphonamidates, *N*-haloarene, oxidation of Indigo Carmine by 194

Sulphonated monoazo dyes, containing a trifluoromethyl group 78
vinylsulphonyl, reactive dyes 79
Sulphonates, diazo, for dyeing and printing of textiles 81
Sulphonyl, reactive dyes, alcoholysis and hydrolysis 400
Sulphonylazide, dyes, thermal investigation 290
1-(4'-Sulphophenyl)-3-methylpyrazolin-5-one, reaction kinetics 194
Sulphur dyes, dyeing by the RD system 32
reuse by tangential microfiltration using ceramic membranes 370
Sulphuric acid esters, of leuco vat dyes, uses of (P)321
'Superwash', process, for antifelt treatment of wool 338
Surface, abrasion testing, in assessment of light fastness of velour automobile upholstery 375
of cellulose, accessibility 120
colours, unique hues in 198
energy, of cotton during preparation 196
properties, of polyester fabrics 340
studies, of titanium dioxide pigments 79
of weathered cotton, chemical analysis 83
Surfactants, alkyl sulphate 338
anionic, applied to wool, substantivity of 195
– and nonionic, in fabric printing 149
– – in washing of wool 117
cationic, interactions with azo dyes 334
fluorescent, fluorescence quenching studies 78
with high efficiency and high biodegradation speed 369
interactions, with azo dyes 335
– with pigment 400
ionic, estimation of concentration 151
multifunctional system 32
nonionic, with acid dyes 371
– fluorescein in micellar solutions of 251
– interaction with reactive dyes 335
– scouring effect 373
silicone, in textile auxiliaries 369
test methods 118
Swiss chemical industry 200
Switzerland, museum of textile printing in 34
Synchronous dyeing system 336
Synthesis of 2-substituted phenyazo-1,3-indandiones 194
of 3-cyanoformazans 115
of 3-hydroxy-2-naphthoic acid amides 115
of 5-hetarylpyrazolo[3,4-*b*]pyrazines 368
of 6-arylazocoumarin derivatives 252
and application, of reactive carbohydrates 374
– of textile printing thickener 373
of aryl anthraquinones 334
of ß- and γ-substituted azotrimethine cyanine dyes 334
of blue-violet and brown-green zirconium silicate pigments from zircon mineral 369
of butadienochromophoric chain-substituted asymmetric cyanines 290
and characterisation, of water-dispersible silica-based pigments: 400
of cyanine dyes 115
of diquino[2,3-*a*:2'3'-*c*]acridine-6,12,18(5*H*14*H*,17*H*)-trione (triquinolonobenzene) 251
of disperse and cationic dyes, from acid dye structures 368
of fluorescent 2,3-fused coumarin derivatives 334
of green-blue zirconium silicate pigment 369
of nickel complexes 116
of Pd(II) and Pt(II) compounds, containing indigo anions 194
of phthalocyanine intermediates and pigments 290
of pink-violet zirconium silicate pigment from zircon mineral 334
and properties, of aminoarylsulphonanilide-3'5'- dicarboxylic acids 334
– of anthraquinone dyes (P)388
of pyrimido[5,4-*d*]pyrimidine derivatives 115
of Rose Bengal and Eosin Y derivatives 251
and spectra, of asymmetric trimethine cyanine dyes 368
of zirconium silicate pigments 369
Synthetic fibres, crystallinity in 340
Synthetic-polymer fibres, red dyes for (P)275

T

Tailing, in cold batch dyeing with reactive dyes 252
Tall oil, rosin derivatives, for printing inks 119
Tannage, bagaruwa-aluminium combination 119
Tanneries, chromium management for 120
effluent, water reclamation from 295
Tannin, analysis, diethylaminoethyl cellulose as a reagent in 295
extraction 295
Tanning, with acrylamide derivatives 403
environmental considerations 402
extracts 295
uptake of basic chrome salts in 200
Tautomerism of azo dyes 194, 400
of [2,2,2]cyclophane-1,2-dione monoarylhydrazones, NMR study 290
in halogen substituted fluorescein in surfactant solutions 251
NMR studies 78, 400
Technological aspects, of recycling of sizing agents 196
Temperature differences, in bulk dyeing 253
Tenderising mechanism, in peroxide bleaching of cotton 150
Test methods, for evaluation of anticorrosive coatings 404
for quality assurance of textile dyes 33
repeatability and reproducibility 83
for surfactants and auxiliaries 118
Testing of fastness 256
of flammability 198
instrumental 293
Tetrametaphosphates, as special pigments 116
Texperto, an expert system for finishing 374
Textiles, adhesive properties, improved by surface fluorination 35
dyeing and printing, diazo sulphonates for 81
– ink jet 81
floorcoverings, atmospheric effects 33
industry, chemistry in the service of 79
– Czechoslovakian (P)398
– economising on heat energy in 374
flame-retardant, in the EC 33
– membrane processes for 375
– resource saving 83
– vertical integration in 375
materials, dyeing process 252
printing, with the Basactiv system 254
– CAD system in 34
– galactomannans in 34
– museum 34
– perfection in 33
– quality assurance in 34
processing, heavy metals in 291
Thên Airflow machine, dyeing of polyester speciality goods with 403
Theory, of washing textile materials 338
Thermal, bonding, of nylon 84
– of polypropylene and other fibres 376
damage, to nylon- 6 199
decomposition, of alkali-treated cellulose 199
fixation dyeing, sorption of C.I. Disperse Blue 94 by polyester during 372
investigation of sulphonylazide dyes 290
properties, of thin layers of dithiolene nickel complexes (P)363
treatment, of triacetate fabric with disperse dyes 291
wax, colour printer 81
Thermoanalytical properties, of nylon 371
of weathered fibre keratin 118
Thermochromism of spirocyclic compounds 115
Thermodynamic affinity, of disperse reactive dyes 80
Thermodynamics of photofading of azo pyridone dyes in amide solvents 368
Thermometry of kinetics of azo coupling reactions 194
Thermoplastics, high temperature, in high performance composites 199
Thermosol dyeing, migration during 253
Thermostability of binary cyclotetraphosphates 251
Thickeners, effect on dyeing properties of reactive dyes 372
environmental considerations 149
printing, rheological behaviour 373
– synthesis and application 373
– for transfer print paper 372
Thiourea derivative, of polyamide-epichlorhydrin resins (P)307
Thread, cotton sewing, economic dyeing 400
Tin based flame-retardant paints 404
Tinctorial strength 151
Titanium dioxide pigments, opacity 334
surface studies 79
Tolerances, attainable 151
Trace elements, estimation 151
Transfer coating with polyurethanes 402
print paper, print thickeners for 372
printing, of cotton warp yarn 372
– dyes 256
– PVC plastisols used in 117
– of warp yarns 81
– of wool and wool/polyester fabrics, effect of pretreatments 372
Translucency of fibre, effect on colour of blends of precoloured fibres 339
Treatment, acid, effect on tensile strength 294
alkaline, of polyester fabrics 82
– of polyester/cotton 117
antimicrobial, of carpets 81
chemical, for changing the dyeability of wool 148
flame-resist, for knitted fabrics 118
liquid, of textile material 292
plasma-chemical, of wool fabrics before printing 151
of reinforced fabrics, with oligomer melts 117
stain resist, of wool 197
of textile effluents 197
topical, of upholstery fabrics, ultraviolet absorbers and antioxidants for 338
of waste water, use of the spring-type filter in 339
Trevira microfibres 403
Triacetate fabric, thermal treatment with disperse dyes 291
Triazinyl reactive dye, hydrolysis products (P)230
Triazinylaminostilbene fluorescent brightening agents (P)49
Triethylamine complexes, application in the dyeing of nylon 336
Trifluoromethyl group, monoazo sulphonated dyes containing 78
Triquinolonobenzene, synthesis 251
Tumbler drying, of acrylic, modacylic and polypropylene fabrics 374

U

Ultrafiltration membranes, composite 403
use for cleaning finishing effluent 197
Ultrasound effects, on dyeing of nylon-6 195
in scouring of cotton 82
in textile dyeing, physico-chemical study 372, 403
Ultraviolet, absorbers, for topical treatment of upholstery fabrics 338
absorption, of pyrimidine derivatives 115
laser irradiation, of polyester 294
stabilisers, for conservation of museum textiles 404
Unlevelness, in dyeing of polyester with mixtures of disperse dyes 80
Upholstery, automotive, finishes 404
fabrics, ultraviolet absorbers and antioxidants for topical treatment 338
Urea, effect on bleaching of wool 82
USA, coatings industry 295

V

Vacuum, extraction, in textile finishing 338
techniques, in yarn dyeing 32
technology, in drying, dyeing and finishing 293
Vat, dyeing, by the RD system 32
– low liquor 79
– and mercerising with 79
– of polyester/cotton with 80
– optimised 79
dyes, for cellulosic fibres, substantivity problems 195
– in cheese dyeing 148
– leuco, sulphuric acid esters (P)321
– print pastes 81
– solubilised, printing with 81
Velour automobile upholstery, assessment of light fastness 375
Vibrational spectroscopy, in identification of (P)187
Video camera, in computerised colour analysis 376
Viewing conditions, various, colour appearance under 198
Vinylsulphonyl reactive dyes, fading of 115, 194, 400
sulphonated 79
Violanthrone dyestuffs, for fluorescent collectors 79
Viscose, fibres, dyeing properties and processing 256
yarn, dyeing with reactive dyes 195
Viscosity, of adhesive, effect on disorientation of pile during flocking 402
effect, on isomerisation kinetics of 3'-nitro-4-diethylaminoazobenzene 78
of print pastes 33
Vision, achromatic, in multichannel modelling 152
colour 340
Visual, discrimination, between white textiles 84
model, for prediction of colour appearance 198
receptor responses, non-linearity 198
system, colour information in 152
– signal coding in 198
Voltametric examination, of stability of reducing agents in print pastes 402

W

Warp sizing 150, 196
machine 255
synthetic polymers used in 252
Wash-and-wear finishing, low-formaldehyde 292
Washability of PVA size 292
Washing, anion effect in removal of cationics from keratin 295
kinetics, algorithm for 292
machinery, buyers' guide 375
of polyester/cotton 117
stone, of denim garments 151
techniques, for garments 370
of textile materials, theory 338
of wool, using surfactants 117
Washing-off, of dyeings, ecological considerations 148
liquors, indigo estimation in 197
of prints produced with reactive dyes 34
Waste, liquors, industrial, utilisation of 197
water, aerobic 339
– application of 2-hydroxyethylmethacrylate 339
– from carpet mills, processing of 255
– treatment, use of the spring-type filter in 339
Water, authorities, view of sizing agents and effluent pollution 339
electromagnetic treatment, effect on quality of wool dyeing 116
from public utility to private service (C)201
quality control 197
reclamation, from tannery effluent 295
recycling 197
technology, in industry aimed at improving the quality of textiles 339
transmission, in layered hydrophilic and hydrophobic fabrics 340
vapour, permeability of textiles to 376
– sorption by polyamides 340
and oil-repellent, finishing, effect on the air permeability of cotton fabric 256
Water-dispersible silica-based pigments, synthesis and characterisation 400
Waterborne coatings 295
Waterproof finishing, use of magnetic activation in 255
Wealth creation, from textile coloration coloration 335
Weathering, artificial, of geotextiles 376
Web-nep procedure, for predicting potential dyeing problems in cotton 256
Weighing process, for silk fabric 292
Welding, of PVC coated fabrics 117
Wet processing, of textile 372
Wet-on-wet techniques 373
Wetting agents, polymeric 32
Wetting-out of finished textiles 374
White textiles, visual discrimination between 84
Whitening, agents, fluorescent, effect on silk phototendering and dye fading 371
of cotton knitted fabrics 292
Whites, fluorescent, spectrophotometry of 84
Winch dyeing, of wool by the integration system 253
Winch-beck dyeing, of cut-pile carpets 116, 271
Wood finishes 120
Wool, antifelt treatment, 'Superwash' process 338
bleaching, with hydrogen peroxide, effect of urea on 82
carpets, cut-pile, winch-beck dyeing of 371
– stain-resistant treatments on 255
chemical research 337
colour measurement, Australian system 198
damage, during carbonisation 118
dyeability, changed by treatments148
dyed and undyed, spinning and knitting 36
dyeing, with acid dyes 80
– with chrome dyes 253
– – continuous 336
– effect of reactive dyes on damage in (P)270
– – using monoethanolamide in 371
– levelling agents 371
– package, with continuous dye metering 371
– and printing 401
– quality, effect of electromagnetic treatment of water 116
– rate, effect of lipids 401
– with reactive dyes 336
– – aftertreatments 401
– recipe optimisation 80

– winch, by the integration system 253
fabrics, black-dyed, improved colour depth 371
– effect of pretreatments on transfer printing of 372
– handle influenced by scouring conditions 34
– knitted 36
– non-shrink, washing using surfactants 117
– padding with Hercosett resin 255
– plasma-chemical treatment before printing 151
– scouring in presence of methylene chloride-water-lecithin system 338
fashion colours, mathematical modelling of 84
fibres, diffusion of dyestuffs into (P)131
– treated in low temperature plasma 255
finishing, felt-free 82
insect-resist agents on (P)241
laser Raman studies of reactive dyes on (P)59
microlevelness 291
modification, by plasma 118
photostabilisation, with Cibafast W 369
pressure decatising 374
printing, discharge 81
raw, scouring of 197
shrink-resist, enzyme treatment 34, 336
sorption of a dispersing agent by 371
surfactants, anionic, substantivity of 195
technology, Australian developments 118
treatment, stain resist 197
untreated, shrinkproofing, by application of dispersion 197
yellowing, during high frequency drying 117
Wool-containing fabrics, flame resistant treatment 255
Wool/polyester fabrics, effect of pretreatments on the transfer printing of 372
Worsted fabrics, dyeing process 253

X

X-ray, crystal structure of aminoazobenzenes 78
studies, on polyacrylonitrile fibres 340

Y

Yarn dyeing 401
measurement unit for 375
simulated, of denims 336
using vacuum techniques 32
lubrication 35
Yarns, warp, transfer printing of 81
Yellow, degradation products of nylon 340
zirconium silicate pigments, synthesis from zircon mineral 369
Yellow–blue opponent process, cone interaction in 198
Yellowing, in nylon, effect of antimicrobial agents 371
of wool, during high frequency drying 117
Your Society needs YOU! (C)85

Z

Zircon, chemicals, crosslinking of emulsion polymers with 84
mineral, synthesis of pigments from 334, 369
Zirconium silicate, pigment, blue-violet 369
– brown 400
– brown-green 369
– green-blue 369
– pink-violet 334
– yellow 369
